Arizona Asbestos No. 1 Crude from Blue Mule Mine, Metate Asbestos Co., Globe, Arizona, U.S.A.

SEPTEMBER 1956

THERE IS A CORE OF NYLON THREAD IN EVERY STRAND OF R/M FINE TAPE

The Nylon core in both the warp and filling yarns of R/M Fine Tapes provides superior tensile for machine and hand wrapping. These tapes also have greater elasticity. This produces a snug fit around the sharp bends in motor coils. R/M Electrical Insulating Tapes have been lab tested and service proved. They are woven .010", .015", .020" and .025" thick.

ADVOCATE MINES — NEWFOUNDLAND

The latest news of the Newfoundland mining scene was the major asbestos discovery of Advocate Mines. The find was made in Advocate's huge concession (1,575 square miles) on the Burlington Peninsula up north.

Drilling already has shown an estimated sixty-five thousand tons per vertical foot. Advocate says this is based on dimensions of approximately 2,500 feet in length, still open at both ends and a width of around two hundred and eighty-five feet. Officials seem highly optimistic of a sizeable operation based on this find and two others which lead them to believe that a whole new asbestos field has been uncovered. The news caused a flurry of excitement in Newfoundland mining circles.
