NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)
GEORGIA-PACIFIC CORPORATION
March 31, 2001

1. PRINCIPLES OF PRESENTATION AND ACCOUNTING POLICIES. The consolidated financial statements include the accounts of Georgia-Pacific Corporation and subsidiaries (the "Corporation"). All significant intercompany balances and transactions are eliminated in consolidation. The interim financial information included herein is unaudited; however, such information reflects all adjustments which are, in the opinion of management, necessary for a fair presentation of the Corporation's financial position, results of operations, and cash flows for the interim periods. All such adjustments are of a normal, recurring nature. Certain 2000 amounts have been reclassified to conform with the 2001 presentation. These consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in the Corporation's annual report on Form 10-K for the fiscal year ended December 30, 2000.

On December 16, 1997, shareholders of the Corporation approved the creation of two classes of common stock intended to reflect separately the performance of the Corporation's manufacturing and timber businesses. The Corporation's manufacturing and timber businesses are referred to hereinafter as the "Georgia-Pacific Group" and "The Timber Company", respectively. The Georgia-Pacific Group's and The Timber Company's combined financial information is presented in Note 12.

During the fourth quarter of 2000, the Corporation implemented EITF 00-10, "Accounting for Shipping and Handling Fees and Costs". EITF 00-10 requires that entities disclose costs incurred related to shipping and handling that are not included in cost of sales. The Corporation currently classifies certain shipping and handling costs as selling and distribution expenses. Shipping and handling costs included in selling and distribution expenses were \$127 million and \$116 million for the first quarter ended March 31, 2001 and April 1, 2000, respectively.

2. PROVISION FOR INCOME TAXES. The effective tax rate used to calculate the benefit (provision) for income taxes was 21% in 2001 and 38% in 2000. The effective tax rate in 2001 was different from statutory rates primarily because of nondeductible goodwill amortization expense associated with business acquisitions. In 2000, the effective tax rate differed from the statutory rate, primarily because of increased state tax credits and increased utilization of foreign sales corporation tax benefits, which more than offset nondeductible goodwill amortization expense associated with business acquisitions.

3. EARNINGS PER SHARE. Basic earnings per share is computed based on net income and the weighted average number of common shares outstanding. Diluted earnings per share reflect the assumed issuance of common shares under long-term incentive stock option and stock purchase plans and pursuant to the terms of the 7.5% Premium Equity Participating Security Units ("PEPS Units"). The computation of diluted earnings per share does not assume conversion or exercise of securities that would have an antidilutive effect on earnings per share. Amounts are computed for each class of common stock based on the separate earnings attributed to each of the respective businesses.

The following table provides earnings and per share data for Georgia-Pacific Group and The Timber Company for 2001 and 2000.

First Quarter

5. INVENTORY VALUATION. Inventories include costs of materials, labor, and plant overhead. The Corporation uses the dollar value method for computing LIFO inventories. The major components of inventories were as follows:

Inventory		March 31,	
In millions,		2001	
Raw materials		\$	\$47
Finished goods			1,170
Supplies			318
LIFO reserve			169
Total inventories		\$	2,604

6. **LIVESTITUPES, ACQUISITIONS AND UNUSUAL ITEMS.** On March 31, 2001, the Corporation announced that it will permanently close its pulp mill and associated chemical plant at Bellingham, Washington. These operations had been temporarily closed since December 2000. The Bellingham pulp mill produced approximately 220,000 tons of pulp, including 135,000 tons of sulfite market pulp, and 260,000 tons of lignin annually. In connection with this closure the Corporation recorded liabilities totaling approximately \$57 million for the write-off of assets, approximately \$13 million for the termination of approximately 420 hourly and salaried employees and approximately \$12 million for facility closure costs. Of the \$82 million total liability, \$78 million was charged to cost of sales, \$3 million was charged to selling and distribution expense and \$1 million was charged to general and administrative expenses. None of the reserves were used as of March 31, 2001.

- o During the first quarter of 2001, the Corporation acquired the remaining ownership of two chemical joint ventures for approximately \$26 million. The results of operations of these chemical businesses were consolidated with those of the Corporation beginning in February 2001. The Corporation has accounted for these acquisitions using the purchase method to record a new cost basis for assets acquired and liabilities assumed.

- o At the end of November 2000, the Corporation completed a tender offer pursuant to which it purchased each outstanding share of common stock of Fort James Corporation ("Fort James") for \$29.60 per share in cash and 0.2644 shares of Georgia-Pacific Group common stock. The Corporation is paying cash and issuing Georgia-Pacific Group shares as the untendered Fort James shares are delivered to the Corporation's exchange agent for cancellation. Through March 31, 2001, the Corporation paid approximately \$6,185 million in cash and issued approximately 53.9 million shares of Georgia-Pacific Group common stock valued at \$1,484 million for such shares. The fair value of the Georgia-Pacific Group common shares was determined based on the average trading prices of Georgia-Pacific Group common stock for the two trading days before and after July 16, 2000 (the announcement of the Fort James acquisition). The Corporation expects to pay an additional \$10 million in cash and issue approximately 91,000 shares valued at \$3 million for Fort James common stock that had not been tendered as of March 31, 2001. In addition, the Corporation assumed \$3.3 billion of Fort James debt in the acquisition.

Fort James' results of operations were consolidated with those of the Corporation beginning in the fiscal month of December 2000. The Corporation has accounted for this business combination using the purchase method to record a new cost basis for assets acquired and liabilities assumed. The allocation of the purchase price and acquisition costs to the assets acquired and liabilities assumed is preliminary as of March 31, 2001, and is subject to change pending finalization of studies of fair value and the finalization of management's plans to restructure certain operations. The difference between the purchase price and the fair value of the assets acquired and liabilities assumed was recorded as goodwill and is being amortized over 40 years. The preliminary allocation of net cash paid for the Fort James acquisition as of March 31, 2001 is summarized as follows:

In millions		
=====		
Current assets	\$	1,741
Property, plant and equipment		4,680
Other noncurrent assets		801
Goodwill		6,773
Liabilities		6,173
Common stock issued and value of stock options		1,401
Converted		

Net cash paid for Fort James	\$	6,115
=====		

In connection with the acquisition of Fort James, the Corporation recorded liabilities totaling approximately \$63 million for employee termination costs relating to approximately 520 hourly and salaried employees. During 2000, no employees were terminated and none of this reserve was used. During 2001, approximately 65 employees were terminated and approximately \$16 million of the reserve was used to pay termination benefits. The Corporation has not finalized its plans for manufacturing and distribution activities. Finalization of these plans may result in additional liabilities recorded as part of the purchase price or charges to earnings. The following table provides a rollforward of the employee separation reserve from December 30, 2000 through March 31, 2001:

In millions					
Balance	Balance			Reversal	
March 31,	Dec. 31,			02	
Type of cost	2000	Additions	Reductions	Reserves	
2001					

Employee separation	\$	17	16		
2001					
=====					

The following unaudited pro forma financial data has been prepared assuming that the acquisition of Fort James and related financings were consummated on January 2, 2000. This pro forma financial data is presented for informational purposes and is not indicative of the operating results that would have occurred had the acquisition been consummated on January 2, 2000, nor does it include adjustments for expected synergies, cost savings or consistent application of accounting methods. Accordingly, this pro forma data is not necessarily indicative of future operations.

	=====	=====

The Timber Company's results of operations are not impacted by the Fort James transaction.

- o In connection with the acquisition of Fort James and pursuant to a consent decree with the U. S. Department of Justice, the Corporation sold a portion of its away-from-home tissue manufacturing operations (formerly Georgia-Pacific Tissue) to Svenska Cellulosa Aktiebolaget SCA for approximately \$850 million. The sale was completed on March 2, 2001, with net proceeds of approximately \$582 million used to repay debt.
- o During 2000 the Corporation announced the closure of the Grand Rapids East, Mich., gypsum plant and the Kalamazoo, Mich., paper mill. In connection with these closures, the Corporation recorded a charge to earnings totaling \$7 million for the termination of approximately 325 salaried and hourly positions, \$25 million for the write-off of assets and \$12 million for facility closing costs. During 2000, approximately 23 employees were terminated and an additional 34 employees were terminated during the first quarter of 2001. The following table provides information related to these charges:

13

In millions	Liability Balance at Dec. 30, 2000	Usage	Liability/ Balance at March 31, 2001
Type of Cost			
Write-off of assets	\$ 2	\$ -	\$ 2
Employee separation	7	.8	6.2
Facility closing costs	10	-	10
Total	\$ 19	\$.8	\$ 18.2

- o During the first quarter of 2000, the Corporation sold certain containerboard and packaging assets resulting in a pre-tax gain of \$24.4 million (\$15.3 million after tax, or \$0.09 diluted earnings per Georgia-Pacific Group share).
- o Also during the first quarter of 2000, the Corporation contributed certain containerboard and packaging assets with a net book value of \$34 million to a joint venture. In exchange for these assets, the Corporation will retain a 52% interest in the joint venture. This investment in the joint venture is accounted for under the equity method.
- o On July 18, 2000, the Corporation signed a definitive agreement to merge The Timber Company with and into Plum Creek Timber Company ("Plum Creek"). Under the agreement, The Timber Company shareholders will receive 1.37 shares of Plum Creek stock for each share of The Timber Company stock. This transaction, which includes the assumption by Plum Creek of approximately \$621 million of debt allocated to The Timber Company, is valued at approximately \$3.6 billion. Plum Creek will assume a 10-year wood supply agreement between Georgia-Pacific Group and The Timber Company. The transaction is subject to approval by the shareholders of both Plum Creek and The Timber Company, receipt of a ruling from the Internal Revenue Service (the "Service") that the transaction will be tax-free to the Corporation and to the shareholders of The Timber Company, and receipt of an opinion from counsel that the merger will qualify as a tax-free reorganization. The transaction is also subject to the satisfaction of customary closing conditions. The Corporation will treat The Timber Company as a discontinued operation once the significant contingencies surrounding the transaction are resolved.

While discussions with the Service continue, it is uncertain whether the Service will issue the requested ruling. In the event that such a ruling is not issued, the Corporation will continue discussions with Plum Creek to determine if an acceptable alternate structure is feasible. In the event no such alternate structure is agreed upon, The Timber Company will be spun off to its shareholders, which will result in it being an independent, publicly-traded company.

- o In connection with the acquisition of Unisource Worldwide, Inc. ("Unisource") at the end of the second quarter of 1999, the Corporation recorded liabilities totaling approximately \$50 million for employee termination (relating to approximately 1,170 hourly and salaried employees) and relocation costs, and \$22 million for closing costs of 48 facilities. The balance of these restructuring reserves at December 30, 2000 was \$8 million. During 2001, approximately 151 employees were terminated as part of this program. The following table provides a rollforward of the reserve for restructuring from December 30, 2000 through March 31, 2001:

In millions		Balance		Reversal	
Balance	Net	Net	Net	Net	Net
March 31,	2000	2000	2000	2000	2000
Type of Cost					
1.1.1					
Employee separation	2	0	4	4	4
Facility, interest costs	1	1	1	1	1
Total	3	1	5	5	5

7. DEBT. At March 31, 2001, the Corporation's debt was \$15.40 billion, \$11.73 billion of which was allocated to the Georgia-Pacific Group and \$3.67 billion of which was allocated to The Timber Company. The debt allocated to each group bears interest at a rate equal to the weighted average interest rate of the Corporation's total debt, calculated on a quarterly basis. At March 31, 2001, the weighted average interest rate on the Corporation's total debt, excluding senior deferrable notes, was 6.89% including outstanding interest rate exchange agreements. Each group's debt increases or decreases by the amount of any cash provided by or used for that group's operating activities, investing activities, dividend payments, share repurchases or issuances and other non-debt-related financing activities.

During the first quarter of 2001, the Corporation increased its accounts receivable secured borrowing program to \$900 million and extended the program through October 2001. Additionally, the Corporation retained former Unsource agreements to sell up to \$150 million of certain qualifying U.S. accounts receivable and up to C\$570 million of certain eligible Canadian accounts receivable. The Corporation increased the Canadian accounts receivable secured borrowing program to C\$95 million in the first quarter of 2001. The U.S. agreement expires in October 2001 and the Canadian agreement expires in May 2004. At March 31, 2001, approximately \$260 million was outstanding under the Corporation's accounts receivable secured borrowing programs in the aggregate. The receivables outstanding under these programs and the corresponding debt are included as both "Receivables" and "Commercial paper and other short-term notes", respectively, on the accompanying balance sheets. All programs are accounted for as secured borrowings. As collections reduce previously pledged interests, new receivables may be pledged.

On March 15, 2001, the Corporation amended the restrictive covenants under its unsecured revolving credit facility (the "credit facility"). These amendments included increasing the maximum leverage ratio (funded indebtedness, excluding senior deferrable notes, to earnings before interest, taxes, depreciation and amortization ("EBITDA")) to 4.50 to 1.00 on March 31, 2001; 4.75 to 1.00 on June 30, 2001; 4.50 to 1.00 on September 30, 2001 and December 31, 2001; 4.00 to 1.00 on March 31, 2002; 4.00 to 1.00 on June 30, 2002 and thereafter. The restrictive covenants also require a minimum net worth that will change on a quarterly basis. The Corporation was in compliance with its debt covenants as of March 31, 2001. As of March 31, 2001, the temporary credit facility totaled \$5,400 million with terms ranging from 6 to 18 months and the permanent credit facility totaled \$3,750 million with a term of 5 years. As of March 31, 2001, \$1,404 million of committed credit was available in excess of all borrowings outstanding under or supported by these credit facilities.

On March 15, 2001, the Corporation redeemed \$100 million of its 6.334% Senior Notes Due March 15, 2011. The Corporation recorded an after-tax extraordinary loss of approximately \$10 million related to this redemption during the 2001 first quarter, which was allocated to Georgia-Pacific Group. In addition, the Corporation had \$100 million of swaps terminate on March 15, 2001 and \$55 million of its 9.25% Senior Notes Due March 15, 2001 mature.

In March, 2001, the Corporation entered into several interest rate swap agreements that effectively converted \$1,500 million of floating rate obligations into fixed rate obligations. At March 31, 2001, the weighted average interest rate was 1.4% for the fixed rate obligations with an average effective interest rate of approximately 1.4%. These agreements have a weighted-average maturity of approximately 1.2 years as of March 31, 2001.

8. **DERIVATIVE INSTRUMENTS AND HEDGING ACTIVITIES.** Effective December 31, 2000, the Corporation adopted Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities," and, accordingly, recorded an after-tax cumulative effect of accounting change credit of \$11 million. All derivatives are recognized in the balance sheet at their fair value. On the date the derivative contract is entered into, the Corporation designates the derivative as either (1) a fair value hedge, (2) a cash flow hedge, (3) the hedge of a net investment in a foreign operation or (4) a non-designated derivative instrument. The Corporation engages primarily in derivatives classified as cash flow hedges, and changes in the fair value of highly effective derivatives are recorded in accumulated other comprehensive loss/income. The Corporation also participates in some derivatives that are classified as non-designated derivative instruments and a hedge in the net investment of the European operations. Changes in the fair value of the non-designated derivative instruments and any ineffectiveness in cash flow hedges are reported in current period earnings. The changes in fair value of the hedge in the net investment of the European operations are recorded in accumulated other comprehensive loss/income.

The Corporation formally documents all relations between hedging instruments and the hedged items, as well as its risk-management objectives and strategy for undertaking various hedge transactions. The Corporation formally assesses, both at the hedge's inception and on an ongoing basis, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in cash flows of the hedged items.

- o **Cash Flow Hedges:** The Corporation uses interest rate swap and foreign currency exchange agreements in the normal course of business to manage and reduce the risk inherent in interest rate and foreign currency fluctuations. Interest rate swap agreements are considered hedges of specific borrowings and differences paid and received under the swap arrangements are recognized as adjustments to interest expense. Such contracts had a total notional amount of \$1,957 million at March 31, 2001.

The Corporation's international operations create exposure to foreign currency exchange rate risks. To manage these risks, the Corporation utilizes short-term foreign exchange contracts. As of March 31, 2001, the Corporation had outstanding foreign exchange contracts with notional amounts of \$14 million to hedge firm and anticipated purchase commitments and firm sales commitments denominated in foreign currencies. A 10% change from the prevailing market rates of these foreign currencies would not have a material effect on the results of operations.

The Corporation also utilizes swap agreements to manage and reduce the risk inherent in market value fluctuations of certain commodities. These commodity swap agreements are designated as hedges of forecasted transactions involved in fixed price sales contracts with customers. Amounts paid to or received under these arrangements are recognized as adjustments to net sales. As of March 31, 2001, the Corporation had outstanding commodity swap cash flow hedges with notional amounts of \$0.6 million with maturity periods of 2 months to 3 years.

With each type of cash flow hedge, the settlement of the forecasted transaction will result in the reclassification into earnings of gains and losses that are reported in accumulated other comprehensive loss/income. As of March 31, 2001, approximately \$0 million of deferred gains on derivative instruments included in accumulated other comprehensive loss are expected to be reclassified to earnings during the next twelve months.

- o Hedge of the net investment in a foreign operation: At March 31, 2001, the Corporation had outstanding approximately \$226 million net of discount of Euro-denominated bonds which were designated as a hedge against its net investment in Europe. The use of these derivative financial instruments allows the Corporation to reduce its overall exposure to exchange rate movements, since the gains and losses on these contracts substantially offset losses and gains on the assets, liabilities and transactions being hedged.
- o Non-designated/ineffective derivative instruments: The Corporation has certain derivative instruments that have been assessed as ineffective hedges or do not qualify for hedge accounting in accordance with SFAS No. 133. Certain commodity swap agreements have been assessed as ineffective due to the variance between the fixed price portion of the swap agreement and the fixed price offered to the customer. The fair value of these contracts at December 31, 2000 was \$1.3 million pre-tax and is included in the cumulative effect of accounting change.

The Corporation also has two foreign currency interest rate swap agreements that were assumed as a result of the acquisition of Fort James. These agreements do not qualify for hedge accounting. Included in the cumulative effect of accounting change is a pre-tax loss of \$1 million relating to the fair value of these agreements.

During 2000, the Corporation entered into a derivative agreement in connection with the sale of certain containerboard and packaging assets whereby the Corporation has guaranteed a certain margin on the buyer's production. This derivative agreement expires in 2005. This agreement does not qualify for hedge accounting because the buyer's production does not qualify as a hedged item in accordance with SFAS No. 133. The Corporation also entered into certain commodity swap agreements to offset the gain on the aforementioned derivative agreement. The net fair value of these derivative agreements was \$17.3 million pre-tax at December 31, 2000 and is included in the cumulative effect of accounting change.

The Corporation's senior management establishes the parameters of the Corporation's financial risk, which have been approved by the Board of Directors. Hedging interest rate exposure through the use of swaps and options and hedging foreign exchange exposure through the use of forward contracts are specifically contemplated to manage risk in keeping with management's policy. Derivative instruments, such as swaps, forwards, options or futures, which are based directly or indirectly upon interest rates, currencies, equities and commodities, may be used by the Corporation to manage and reduce the risk inherent in price, currency and interest rate fluctuations.

The Corporation does not utilize derivatives for speculative purposes. Derivatives are transaction-specific so that a specific debt instrument, contract or invoice determines the amount, maturity and other specifics of the hedge. Counterparty risk is limited to institutions with long-term debt ratings of A or better.

9. LONG-TERM APPRECIATION PLAN. The Corporation reserved 2,600,000 stock appreciation rights ("SAR") for issuance under the 2001 Long-Term Appreciation Plan (the "LTAP"). The LTAP provides for the granting of SAR units to key employees of the Corporation. During the first quarter of 2001, the Corporation issued 1.4 million SAR units under the LTAP with an exercise price of \$29.47 per unit. The SAR exercise price was based on the underlying fair value of Georgia-Pacific Group common stock at the grant date. These SAR units vest over three years. Compensation expense for the SARs is based on the difference between the current fair market value of Georgia-Pacific Group common stock and the fair market value at the date of grant. As of March 31, 2000 no compensation expense was recorded.

1. The Georgia-Pacific-Armco, Inc. Divender of 1991, the Distribution, included First Energy Securities, Inc. ("First Energy"), a wholly owned subsidiary of First Energy, Inc. ("First Energy"). The Distribution was made to the holders of Georgia-Pacific Group common stock and to the holders of Georgia-Pacific Group preferred stock and to the holders of Georgia-Pacific Group stock in First Energy. The Distribution was not made to the holders of Georgia-Pacific Group stock in First Energy. Effective with the agreement to dispose of The Timber Company, see Note 6, the Corporation is precluded from purchasing shares of The Timber Company, Inc.

During the first quarter of 2001, Georgia-Pacific Group purchased in the open market approximately 1,414,000 shares of Georgia-Pacific Group common stock at an aggregate price of approximately \$50 million (\$35.40 average per share), all of which were held as treasury stock at April 1, 2001. During the first quarter of 2001, The Timber Company purchased in the open market approximately 1,070,000 shares of The Timber Company common stock at an aggregate price of approximately \$25 million (\$23.37 average per share). Of these repurchased shares, approximately 499,000 shares of The Timber Company common stock were held as treasury stock and approximately 571,000 shares were purchased during the first quarter of 2001 and settled after April 1, 2001.

11. COMMITMENTS AND CONTINGENCIES. The Corporation is a party to various legal proceedings, potential to its business and is subject to a variety of environmental and pollution control laws and regulations in all jurisdictions in which it operates. As is the case with other companies in similar industries, the Corporation faces exposure from actual or potential claims and legal proceedings involving environmental matters. Liability insurance in effect during the last several years provides only very limited coverage for environmental matters.

The Corporation is involved in environmental remediation activities at approximately 199 sites, both owned by the Corporation and owned by others, where it has been notified that it is or may be a potentially responsible party under the Comprehensive Environmental Response, Compensation and Liability Act or similar state "superfund" laws. Of the known sites in which it is involved, the Corporation estimates that approximately 46% are being investigated, approximately 18% are being remediated and approximately 36% are being monitored (an activity that occurs after either site investigation or remediation has been completed). The ultimate costs to the Corporation for the investigation, remediation and monitoring of many of these sites cannot be predicted with certainty, due to the often unknown magnitude of the pollution or the necessary cleanup, the varying costs of alternative cleanup methods, the amount of time necessary to accomplish such cleanups, the evolving nature of cleanup technologies and governmental regulations, and the inability to determine the Corporation's share of multiparty cleanups or the extent to which contribution will be available from other parties. The Corporation has established reserves for environmental remediation costs for these sites in amounts that it believes are probable and reasonably estimable. Based on analysis of currently available information and previous experience with respect to the cleanup of hazardous substances, the Corporation believes it is reasonably possible that costs associated with these sites may exceed current reserves by amounts that may prove insignificant or that could range, in the aggregate, up to approximately \$154 million. This estimate of the range of reasonably possible additional costs is less certain than the estimates upon which reserves are based, and in order to establish the upper limit of such range, assumptions least favorable to the Corporation and the range of reasonably possible outcomes were used. In estimating both the current reserve for environmental remediation and the possible range of additional costs, the Corporation has not assumed it will bear the entire cost of remediation of every site or the exclusion of other known potentially responsible parties who may be jointly and severally liable. The ability of other potentially responsible parties to participate has been taken into account based generally on the parties' financial condition and probable contribution on a per site basis.

The Corporation is implementing an Administrative Order or Consent entered into with the Michigan Department of Natural Resources and the Environmental Protection Agency regarding an investigation of the Kalamazoo River and two disposal areas which are contaminated with polychlorinated biphenyls. Data regarding the extent of contamination at the two disposal areas has been evaluated. The cost to remediate one of the disposal areas was estimated at \$8 million and this site has been essentially closed. It is anticipated that the cost of remediation of the second disposal area will be at least equal to that amount.

While at the time, the Corporation is still negotiating a final cleanup agreement with the State of Michigan, Fort James is not a signatory to the Administrative Order on Consent.

A draft Remedial Investigation/Feasibility Study ("RI/FS") for the Kalamazoo River was submitted to the State of Michigan in October 1999. RI/FS is the Corporation and other potentially responsible parties ("PRPs"), including Fort James Corporation. The PRPs' draft RI/FS evaluated five remedial options ranging from no action to total dredging of the river and offshore disposal of the dredged materials. The cost for these remedial options ranges from \$1 to \$2.5 billion. The PRPs' draft RI/FS recommends a remedy involving stabilization of over twenty miles of river bank and long term monitoring of the river bed. However, the State of Michigan has asked for additional possible remedies. The total cost for the PRPs' recommended remedy is approximately \$75 million.

Fort James has been identified as a PRP for contamination of the Lower Fox River and Green Bay system in Wisconsin by hazardous substances. Various state and federal agencies and tribal entities are seeking both sediment restoration and natural resources damages. In February 1999, the Wisconsin Department of Natural Resources ("WDNR") released for public comment a draft remedial investigation/feasibility study of the Fox River. While the draft study did not advocate any specific restoration alternatives, it included estimated total costs ranging from zero for "no action" to approximately \$700 million, depending on the alternative or combination of alternatives selected.

In June 1999, Fort James voluntarily entered into an agreement with the WDNR and the EPA for the restoration of one sediment area on the Fox River. The project began in August 1999 and was completed on December 15, 1999 at a cost of approximately \$8 million.

In October 1999, the U.S. Fish and Wildlife Service ("FWS") released for public comment its Restoration and Compensation Determination Plan, the "Plan", for natural resources damages in connection with its Lower Fox River/Green Bay Natural Resource Damage Assessment. According to the Plan, claims for past damages and present and future losses allegedly resulting from contamination of the Fox River by hazardous substances range from \$176 million to \$333 million, depending on the sediment restoration alternative or combinations of alternatives selected. The actual costs of projects to settle natural resource damage claims could be significantly lower.

In November 1999, Fort James entered into a settlement with WDNR that resolves the state's natural resource damages claims against Fort James under CERCLA, the Federal Water Pollution Control Act, and state law. Under the agreement, Fort James has agreed to spend approximately \$7 million. The agreement will be effective when entered by the federal court.

The final cleanup alternatives and the Corporation's share of the related costs, for both the Fox River and Kalamazoo River matters, are unknown at this time.

The Corporation and many other companies are defendants in suits brought in various courts around the nation by plaintiffs who allege that they have suffered personal injury as a result of exposure to asbestos-containing products. These suits allege a variety of lung and other diseases based on alleged exposure to products previously manufactured by the Corporation. In many cases, the plaintiffs are unable to demonstrate that they have suffered any compensable loss as a result of such exposure, or that any injuries they have incurred in fact resulted from exposure to the Corporation's products.

The Corporation is currently defending the claims of approximately 17,000 plaintiffs as of December 31, 2000, and anticipates that additional claims will be filed against it over the next several years. The number of claims filed against the Corporation, and the average cost of resolving such claims, has increased somewhat over the last three years. The Corporation generally settles asbestos cases for amounts it considers reasonable given the facts and circumstances of each case. Historically, all of the amounts it has paid to date to defend and resolve these cases have been covered by product liability insurance. The Corporation has agreements with its insurers to utilize insurance in amounts which it believes are adequate to cover substantially all of the defense costs and liabilities for currently pending cases, as well as the reasonably

fireproofable defense costs and liabilities attributable to claims which may be filed against it over the next several years. The Corporation maintains insurance coverage which it believes will cover a substantial part of its probable costs and liabilities attributable to additional future claims over some period of years, depending on the number of claims filed each year in the future and the average cost of resolving each claim. However, there can be no assurance that such coverage will be adequate to cover the costs of all future claims, or that the part of such defense costs and liabilities not covered by such insurance will not be material to the Corporation. The Corporation has established reserves with respect to pending cases for the liabilities and defense costs it believes are probable and reasonably estimable, and has also purchased a reserve for insurance to the extent that the realization of the claim is deemed probable.

In May of 1999, a lawsuit was filed in state court in Columbus, Ohio, against the Corporation and Georgia-Pacific Resins, Inc. ("GPR", a wholly-owned subsidiary of the Corporation). The lawsuit was filed by eight plaintiffs who seek to represent a class of individuals who at any time from 1989 to the present lived, worked, resided, owned, frequented or otherwise occupied property located within a three-mile radius of GPR's resin manufacturing operations in Columbus, Ohio. The lawsuit alleges that the individual plaintiffs and putative class members have suffered personal injuries and/or property damage because of (1) alleged "continuous" and long-term releases and threats of releases of noxious fumes, gases and harmful chemicals, including hazardous substances" from GPR's and GPR's and/or (2) a September 10, 1999 explosion at the Columbus facility and alleged release of hazardous material resulting from that explosion. Virtually all activity in this case has been staying pending a decision on a motion by plaintiffs for reconsideration of a case management order issued by the court. The Corporation has denied the material allegations of this lawsuit. While it is premature to evaluate the claims asserted in this lawsuit, the Corporation believes in its meritorious defenses. Prior to the filing of the lawsuit, the Corporation had received a number of explosion-related claims from nearby residents and businesses. These claims were for property damage, personal injury and business interruption and were being reviewed and resolved on a case-by-case basis. On January 12, 2000, five plaintiffs, including one of the class representatives in the state class action, filed a lawsuit against the Corporation and GPR pursuant to the citizen suit provisions of the federal Clean Air Act and the Community Right-to-Know law. This suit alleges violations of these federal laws and certain state laws regarding the form and substance of the defendants' reporting of emissions and alleged violations of permitting requirements under certain regulations issued under the Clean Air Act. This suit seeks civil penalties of \$25,000 per day, per violation, an injunction to force the defendants to comply with these laws and regulations and other relief. The defendants have denied the material allegations of the complaint. While it is premature to completely evaluate these claims, the Corporation believes it has meritorious defenses.

In August 1995, Fort James, now a wholly-owned subsidiary of the Corporation, transferred certain assets and liabilities of its commercial printing and food packaging businesses to two newly formed companies, Brown Vantage, Inc., ("BV") (a wholly-owned subsidiary of Fort James) and BV's subsidiary Crown Paper Co. ("CP"). CP then entered into a \$100 million credit facility with certain banks and issued \$100 million face amount of senior subordinated notes. Approximately \$400 million in proceeds from these financings were transferred to BV in payment for the transferred assets and other consideration. BV also issued to Fort James a pay-in-kind note with a face amount of \$100 million. The notes were then spun off to the Fort James shareholders and CP operated these businesses as a stand-alone company beginning in August 1996.

In March 2001 CP and BV filed for bankruptcy. Various creditors have indicated that the borrowings made by CP and BV, and the payments to Fort James for the assets transferred to BV and CP caused those companies to become insolvent, and therefore that the transfer of such assets was a fraudulent conveyance. In April 2001, Fort James filed suit against CP and BV in Federal Bankruptcy Court in Oakland, California seeking a declaratory judgment that the transactions did not involve any fraudulent conveyance and that other parties and actions were the cause of the bankruptcy of BV and CP. Fort James does not believe that any of its actions in establishing BV or CP involved a fraudulent conveyance or raised the bankruptcy of those companies.

Although the ultimate outcome of these environmental matters and legal proceedings cannot be determined with certainty, based on presently available information, management believes that adequate reserves have been established for probable losses with respect thereto. Management further believes that the ultimate outcome of such environmental matters and legal proceedings could be material to operating results in any given quarter or year but will not have a material adverse effect on the long-term results of operations, liquidity or consolidated financial position of the Corporation.

14. SUBSEQUENT EVENT. On April 30, the Corporation announced that it had signed a letter of intent to sell a portion of the Corporation's pulp and paper manufacturing assets to Lomtar Inc. The assets involved in this sale are the Corporation's stand-alone uncoated free sheet paper mills at Ashdown, Arkansas, Woodland, Maine, and Nextira and Port Edwards, Wisconsin, as well as the associated pulp facilities at Ashdown and Woodland. The sale, which is contingent upon the completion of due diligence, execution of a definitive asset purchase agreement and receipt of necessary regulatory approvals, is expected to be completed in the second quarter of 2001. The Corporation intends to use the net proceeds of a sale of those facilities to repay debt.
15. OPERATING SEGMENT INFORMATION. The Corporation has five reportable operating segments: building products, timber, containerboard and packaging, bleached pulp and paper, and consumer products. The following represents selected operating data for each reportable segment for the three months ended March 31, 2001 and April 1, 2000.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

FIRST QUARTER 2001 COMPARED WITH FIRST QUARTER 2000

The Corporation reported consolidated net sales of approximately \$6.4 billion for the first quarter of 2001 and \$5.6 billion for the first quarter of 2000. Included in 2001 are \$1.5 billion of net sales from the recently acquired Fort James operations.

Interest expense increased \$176 million to \$321 million in the first quarter of 2001 compared with \$145 million in the first quarter of 2000, principally as a result of higher debt levels incurred as a result of the Fort James transaction.

The Corporation reported a pretax loss of \$145 million and an income tax benefit of \$31 million for the first quarter of 2001, compared with pretax income of \$ 77 million and income tax provision of \$143 million for the first quarter of 2000. The effective tax rate in 2001 was different from statutory rates primarily because of nondeductible goodwill amortization expense associated with business acquisitions. In 2000, the effective tax

rate differed from the statutory rates, primarily because of increased state tax credits and increased utilization of foreign sales corporation tax benefits, which more than offset nondeductible goodwill amortization expense associated with business acquisitions.

On December 31, 2000, the Corporation adopted Statement of Financial Accounting Standards No. 133, "Accounting for Derivative Instruments and Hedging Activities," and, accordingly, recorded an after-tax cumulative effect of accounting change credit of \$11 million.

During the first quarter of 2001, the Corporation refinanced approximately \$300 million of debt assumed in the Fort James acquisition and, accordingly, recorded an after-tax extraordinary loss on the early extinguishment of debt of \$12 million.

The remaining discussion refers to the "Consolidated Selected Operating Segment Data" table (included in Note 15 to the Consolidated Financial Statements).

BUILDING PRODUCTS

The Corporation's building products segment reported net sales of \$1,762 million and an operating loss of \$24 million for the first quarter of 2001. Net sales and operating profits were \$2,328 million and \$206 million, respectively, in 2000. The decrease in quarter-over-quarter net sales and operating profits resulted from a significant decrease in overall selling prices and volumes. Average selling prices for plywood, softwood lumber and gypsum decreased 12%, 18% and 35%, respectively compared to the prior year. Sales volumes for plywood decreased 16% and softwood lumber volumes decreased 30%. The Corporation expects improvement in most of its building products markets in the second and third quarter of 2001.

TIMBER

In the first quarter of 2001 and 2000, the timber segment reported net sales of approximately \$91 million and \$102 million, respectively, and operating profits of \$47 million and \$75 million, respectively. The decrease in year-over-year profits is due to a decline in both sales volume and selling prices. The Corporation expects improvement in sales volume as demand for the timber segment's sawtimber increases.

CONTAINERBOARD AND PACKAGING

The Corporation's containerboard and packaging segment reported net sales of \$638 million and operating profits of \$88 million in the first quarter of 2001, compared with net sales of \$677 million and operating profits of \$131 million in the first quarter of 2000. During the first quarter of 2000, the Corporation sold certain containerboard and packaging assets resulting in a pre-tax gain of \$24 million. Excluding these gains, return on sales decreased to 14% in 2001 compared to 16% in 2000. The decrease in year-over-year operating profit was due primarily to a 4% decline in sales volumes for containerboard, 10% lower sales volumes for packaging products and higher energy costs in the first quarter of 2001 compared to the prior year's first quarter, offset somewhat by lower secondary fiber costs and increased average selling prices. During the first quarters of 2001 and 2000, the Corporation incurred

market-related paper machine slowback or shut downs at its containerboard mills, resulting in a reduction in containerboard production of 40,000 tons and 88,000 tons, respectively. The Corporation also announced that the #2 paper machine at the Toledo mill will cease production beginning May 6,

2001, until market demand returns. Prices for containerboard and packaging are expected to remain relatively constant throughout the remainder of the year.

BLEACHED PULP AND PAPER

The Corporation's bleached pulp and paper segment reported net sales of \$2,227 million and operating profits of \$57 million in the 2001 first quarter. For the same period in 2000, the segment reported net sales of \$2,256 million and operating profits of \$114 million. Return on sales decreased to 3% in 2001 compared with 5% for the same period a year ago. The decrease in 2001 operating profits was due primarily to a 11% decline in pulp sales volumes and increased energy and paper chemical costs. The Corporation expects selling prices for pulp to continue to decrease in the second and third quarters of 2001 and expects selling prices for paper to increase slightly during the second half of the year.

CONSUMER PRODUCTS

Net sales and operating profits for the consumer products segment were \$1,955 million and \$101 million, respectively, for the quarter ended March 31, 2001, which included net sales and operating profits of \$1,514 million and \$141 million, respectively, from the operations of Fort James that were acquired at the end of November 2000. Operating profits for the 2001 first quarter also include a one-time charge of \$82 million related to the closure of the Bellingham pulp and lignin operations. First quarter 2000 net sales and operating profits were \$494 million and \$52 million, respectively. Excluding the one-time charge, return on sales decreased to 9% compared with 11% a year ago. This decrease is primarily due to increased energy costs.

In connection with the acquisition of Fort James, the Corporation sold a portion of its away-from-home tissue manufacturing operations (formerly Georgia-Pacific Tissue) on March 2, 2001. Net sales and operating (losses) profits related to these operations were \$97 million and \$(1) million in the first quarter of 2001, respectively, compared to \$162 million and \$12 million, respectively, in the first quarter of 2000.

The Corporation expects pricing for its consumer products segment to decline slightly throughout 2001 ending at levels below year-end 2000.

OTHER

The operating loss in the "Other" nonreportable segment, which includes some miscellaneous businesses, unallocated corporate operating expenses and the elimination of profit on intersegment sales, increased by \$37 million to a loss of \$93 million in 2001 from a loss of \$56 million in the 2000 first quarter. This increase was primarily a result of higher legal and environmental expenses, higher expenses associated with the Corporation's captive insurance program and higher corporate marketing expenses.

LIQUIDITY AND CAPITAL RESOURCES

OPERATING ACTIVITIES. The Corporation generated cash from operations of \$183 million for the three months ended March 31, 2001 compared with \$266

million a year ago. The decrease in cash provided by operating activities is primarily due to lower operating results for the quarter.

INVESTING ACTIVITIES. Capital expenditures for property, plant and equipment for the three months ended March 31, 2001 were \$192 million, which included \$25 million in the building products segment, \$20 million in the containerboard and packaging segment, \$40 million in the bleached pulp and paper segment, \$96 million in the consumer products segment and \$11 million in the other nonreportable segment. The Corporation expects to make capital expenditures for property, plant and equipment of approximately \$900 million in 2001.

Cash paid for timber and timberlands was \$37 million in the first three months of 2001 compared with \$59 million in 2000.

At the end of November 2000, the Corporation completed a tender offer pursuant to which it purchased each outstanding share of common stock of Fort James for \$29.60 per share in cash and 0.2644 shares of Georgia-Pacific Group common stock. The Corporation is paying cash and issuing Georgia-Pacific Group shares as the untendered Fort James shares are delivered to the Corporation's exchange agent for cancellation. Through March 31, 2001, the Corporation paid approximately \$6,185 million in cash (\$45 million of which was paid during the first quarter of 2001) and issued approximately 53.3 million shares of Georgia-Pacific Group common stock (0.2 million shares of which were issued during the first quarter of 2001) valued at \$1,484 million for such shares. The fair value of the Georgia-Pacific Group common shares was determined based on the average trading prices of Georgia-Pacific Group common stock for the two trading days before and after July 16, 2000 (the announcement of the Fort James acquisition). The Corporation expects to pay an additional \$10 million in cash and issue approximately 91,000 shares valued at \$3 million for Fort James common stock that had not been tendered as of March 31, 2001.

During the first quarter of 2001, the Corporation acquired the remaining ownership of two chemical joint ventures for approximately \$26 million. The results of operations of these chemical businesses were consolidated with those of the Corporation beginning in February 2001. The Corporation has accounted for these acquisitions using the purchase method to record a new cost basis for assets acquired and liabilities assumed.

In connection with the acquisition of Fort James and pursuant to a consent decree with the U. S. Department of Justice, the Corporation sold a portion of its away-from-home tissue manufacturing operations (formerly Georgia-Pacific Tissue) to Svenska Cellulosa Aktiebolaget SCA for approximately \$850 million. The sale was completed on March 2, 2001, with net proceeds of approximately \$582 million used to repay debt.

On July 18, 2000, the Corporation signed a definitive agreement to merge The Timber Company with and into Plum Creek. Under the agreement, The Timber Company shareholders will receive 1.37 shares of Plum Creek stock for each share of The Timber Company stock. This transaction, which includes the assumption by Plum Creek of approximately \$621 million of debt allocated to The Timber Company, is valued at approximately \$3.6 billion. Plum Creek will assume a 10-year wood supply agreement between Georgia-Pacific Group and The Timber Company. The transaction is subject to approval by the shareholders of both Plum Creek and The Timber Company, receipt of a ruling from the Internal Revenue Service that the transaction will be tax-free to the Corporation and to the shareholders of The Timber Company, and receipt of an opinion from counsel that the merger will qualify as a tax-free reorganization. The transaction is also subject to the satisfaction of customary closing conditions. The Corporation will treat The Timber Company as a discontinued operation once the significant contingencies surrounding the transaction are resolved.

While discussions with the Service continue, it is uncertain whether the Service will issue the requested ruling. In the event that such a ruling is not issued, the Corporation will continue discussions with Plum Creek to determine if an acceptable alternate structure is feasible. In the event no such alternate structure is agreed upon, The Timber Company will be spun off to its shareholders, which will result in it being an independent, publicly-traded company.

37

During the first quarter of 2000, the Corporation sold certain containerboard and packaging assets resulting in a pre-tax gain of \$24.4 million (\$15.3 million after tax, or \$0.09 diluted earnings per Georgia-Pacific Group share).

FINANCING ACTIVITIES. The Corporation's debt was \$15.46 billion, \$14.78 billion of which was allocated to the Georgia-Pacific Group and \$621 million of which was allocated to The Timber Company. The debt of each of the groups bears interest at a rate equal to the weighted average interest rate of the Corporation's total debt, calculated on a quarterly basis. At March 31, 2001, the weighted average interest rate on the Corporation's total debt, excluding senior deferrable notes, was 6.88% including outstanding interest rate exchange agreements. Each group's debt increases or decreases by the amount of any cash provided by or used for that group's operating activities, investing activities, dividend payments, share repurchases or issuances and other non-debt-related financing activities.

During the first quarter of 2001, the Corporation extended its \$800 million accounts receivable secured borrowing program through October 2001. Additionally, the Corporation retained former Unisource agreements to sell up to \$150 million of certain qualifying U.S. accounts receivable and up to C\$95 million of certain eligible Canadian accounts receivable. The U.S. agreement expires in October 2001 and the Canadian agreement expires in May 2004. At March 31, 2001, approximately \$860 million was outstanding under the Corporation's accounts receivable secured borrowing programs in the aggregate. The receivables outstanding under these programs and the corresponding debt are included as both "Receivables" and "Commercial paper and other short-term notes", respectively, on the accompanying balance sheets. All programs are accounted for as secured borrowings. As collections reduce previously pledged interests, new receivables may be pledged.

The Corporation's international operations create exposure to foreign currency exchange rate risks. To manage these risks, the Corporation utilizes foreign exchange contracts. As of March 31, 2001, the Corporation had outstanding foreign exchange contracts with notional amounts of \$14 million to hedge firm and anticipated purchase commitments and firm sales commitments denominated in foreign currencies. At March 31, 2001, the Corporation had outstanding approximately \$228 million (net of discount) of Euro-denominated bonds which were designated as a hedge against its net investment in Europe. The use of these derivative financial instruments allows the Corporation to reduce its overall exposure to exchange rate movements, since the gains and losses on these contracts substantially offset losses and gains on the assets, liabilities and transactions being hedged. A 10% change from the prevailing market rates of these foreign currencies would not have a material effect on the results of operations.

On March 15, 2001, the Corporation amended the restrictive covenants under its unsecured revolving credit facility (the "credit facility"). These amendments included increasing the maximum leverage ratio funded indebtedness, excluding senior deferrable notes, to earnings before

interest, taxes, depreciation and amortization ("EBITDA")) to 4.50 to 1.00 on March 31, 2001; 4.75 to 1.00 on June 30, 2001; 4.50 to 1.00 on September 29, 2001 and December 29, 2001; 4.25 to 1.00 on March 30, 2002; 4.00 to 1.00 on June 29, 2002 and thereafter. The restrictive covenants also require a minimum net worth that will change on a quarterly basis. The Corporation was in compliance with its debt covenants as of March 31, 2001. As of March 31, 2001, the temporary credit facility totaled \$1,100 million with terms ranging from 6 to 16 months and the permanent credit facility totaled \$3,750 million with a term of 5 years. As of March 31, 2001, \$1,404 million of committed credit was available in excess of all borrowings outstanding under or supported by these credit facilities.

On March 15, 2001, the Corporation also redeemed \$300 million of its 6.234% Senior Notes Due March 15, 2011. The Corporation recorded an after-tax extraordinary loss of approximately \$12 million related to this redemption during the 2001 first quarter, which was allocated to Georgia-Pacific Group. In addition, the Corporation had \$300 million of swaps terminate on March 15, 2001 and \$55 million of its 9.25% Senior Notes Due March 15, 2001 mature.

In January 2001, the Corporation entered into several interest rate exchange agreements that effectively converted \$1,500 million of floating rate obligations into fixed rate obligations. At both January 31 and March 31, 2001, the weighted average interest rates were 5.6% for the fixed rate obligations with an average effective interest rate of approximately 5.9%. These agreements have a weighted-average maturity of approximately 1.2 years as of March 31, 2001.

38

The table below presents principal (or notional) amounts and related weighted average interest rates by year of expected maturity for the Corporation's debt obligations as of March 31, 2001. For obligations with variable interest rates, the table sets forth payout amounts based on current rates and does not attempt to project future interest rates.

The Corporation has the intent and ability to refinance commercial paper and other short-term notes as they mature. Therefore, maturities of these obligations are reflected as cash flows expected to be made after 2005.

The Corporation's senior management establishes the parameters of the Corporation's financial risk, which have been approved by the Board of Directors. Hedging interest rate exposure through the use of swaps and options and hedging foreign exchange exposure through the use of forward contracts are specifically contemplated to manage risk in keeping with management policy. Derivative instruments, such as swaps, forwards, options or futures, which are based directly or indirectly upon interest rates, currencies, equities and commodities, may be used by the Corporation to manage and reduce the risk inherent in price, currency and interest rate fluctuations.

The Corporation does not utilize derivatives for speculative purposes. Derivatives are transaction-specific so that a specific debt instrument, contract or invoice determines the amount, maturity and other specifics of the hedge. Counterparty risk is limited to institutions with long-term debt ratings of A or better.

In November of 2000, the Corporation acquired Fort James (see Note 6). Through March 31, 2001, the Corporation has issued 21.5 million shares of Georgia-Pacific Group treasury stock and 32.4 million newly issued shares of Georgia-Pacific Group stock in exchange for outstanding common stock of Fort James. The Corporation does not hold any Georgia-Pacific Group stock in Treasury as of March 31, 2001. Effective with the agreement to dispose of The Timber Company (see Note 6), the Corporation is precluded from purchasing shares of The Timber Company Stock.

40

During the first quarter of 2000, Georgia-Pacific Group purchased on the open market approximately 1,414,000 shares of Georgia-Pacific Group common stock at an aggregate price of approximately \$50 million (\$35.43 average per share), all of which were held as treasury stock at April 1, 2000. During the first quarter of 2000, The Timber Company purchased on the open market approximately 1,075,000 shares of The Timber Company common stock at an aggregate price of approximately \$25 million (\$22.77 average per share). Of these repurchased shares, approximately 899,000 shares of The Timber Company common stock were held as treasury stock and approximately 176,000 shares were purchased during the first quarter of 2000 and sold after April 1, 2000.

During the first quarter of 2001, the Corporation paid dividends totaling \$28 million and \$20 million, for Georgia-Pacific Group and The Timber Company, respectively. During the first quarter of 2000, the Corporation paid dividends totaling \$21 million for both Georgia-Pacific Group and The Timber Company.

In 2001, the Corporation expects its cash flow from operations, together with proceeds from any asset sales and available financing sources, to be sufficient to fund planned capital investments, pay dividends and make scheduled debt payments.

OTHER. The Corporation employs approximately 85,000 people, approximately 33,000 of whom are members of unions. The Corporation considers its relationship with its employees to be good. Sixty-five union contracts are subject to negotiation and renewal in 2001, including ten at major facilities. Five of these contracts were renewed during the first quarter of 2001.

On April 30, the Corporation announced that it had signed a letter of intent to sell a portion of the Corporation's pulp and paper manufacturing assets to Domtar Inc. The assets involved in this sale are the Corporation's stand-alone uncoated free sheet paper mills at Ashdown, Arkansas, Woodland, Maine, and Nekoosa and Port Edwards, Wisconsin, as well as the associated pulp facilities at Ashdown and Woodland. The sale, which is contingent upon the completion of due diligence, execution of a definitive asset purchase agreement and receipt of necessary regulatory approvals, is expected to be completed in the second quarter of 2001. The Corporation intends to use the net proceeds of a sale of these facilities to repay debt.

On January 1, 1999, eleven of the fifteen members of the European Union (the "Participating Countries") established fixed conversion rates between their existing sovereign currencies (the "Legacy Currencies") and a single new currency (the "Euro"). For a three-year transition period, transactions can be conducted in both the Euro and the Legacy Currencies but all corporate transactions and records must legally be maintained in Euros effective January 1, 2002. The adoption of the Euro will affect a multitude of financial systems and business applications. The Corporation has

operations in seven of the Participating Countries, including Greece, which adopted the Euro effective January 2001, and has product sales in ten of the Participating Countries. The Corporation's European businesses affected by the Euro conversion have established plans to address the information system issues and the potential business implications of converting to a common currency. As of March 31, 2001, the Corporation's financial information technology systems were capable of processing Euro-denominated transactions but the Euro is not yet the reporting or functional currency for any part of our business. The Corporation believes it will be able to modify the remaining financial systems and business activities to complete the process of conversion and transition to the Euro as our functional business currency prior to year-end 2001 for the countries concerned. The Corporation is unable to determine the financial effect of the conversion on its operations, if any, since such effect depends on the competitive conditions which exist in the various regional markets in which the Corporation operates and potential actions which may or may not be taken by the Corporation's competitors, customers and suppliers.

41

CAUTIONARY STATEMENT FOR PURPOSES OF THE "SAFE HARBOR" PROVISIONS OF THE PRIVATE SECURITIES LITIGATION REFORM ACT OF 1995. The statements under "Management's Discussion and Analysis" and other statements contained herein that are not historical facts are forward-looking statements (as such term is defined under the Private Securities Litigation Reform Act of 1995) based on current expectations. The accuracy of such statements is subject to a number of risks, uncertainties and assumptions. In addition to the risks, uncertainties and assumptions discussed elsewhere herein, factors that could cause or contribute to actual results differing materially from such forward-looking statements include the following: the industry's production capacity continuing to exceed demand for its pulp and paper products, necessitating continued market-related downtime; changes in the productive capacity and production levels of other building products and pulp and paper producers; the effect on the Corporation of changes in environmental and pollution control laws and regulations; the general level of economic activity in U.S. and export markets; further decreases in the level of housing starts or lessened home remodeling in the U.S.; fluctuation in interest rates and currency exchange rates; the effect of general global economic conditions on the demand for timber; the effect of any material changes in the available supply and cost of timber and wood fiber, including the levels of harvests from public lands, and the effect of government, legislative and environmental restrictions on the harvesting of private timberlands; the ability of the Corporation to successfully integrate its newly acquired consumer product businesses and to complete scheduled asset divestitures; the ability to complete the merger of The Timber Company with Plum Creek; and other risks, uncertainties and assumptions discussed in the Corporation's periodic filings with the Securities and Exchange Commission.

For a discussion of commitments and contingencies refer to Note 11 of the Notes to Consolidated Financial Statements.

PART II - OTHER INFORMATION

GEORGIA-PACIFIC CORPORATION
March 31, 2001

Item 1. Legal Proceedings reference. (a) Exhibits

Item 1. Legal Proceedings

The information contained in Note 11 "Commitments and Contingencies" of the Notes to Consolidated Financial Statements filed as part of this Quarterly Report on Form 10-Q is incorporated herein by reference. 'a' Exhibits

- Item 1. Legal Proceedings reference.
- Item 6. Exhibits and Reports on Form 8-K
- (a) Exhibits

Item 1. Legal Proceedings reference. (a) Exhibits
Exhibit 3.2 - Bylaws, as amended to date.

(b) Reports on Form 8-K
During the first quarter of 2001, the Corporation filed a report on Form 8-K on January 26, 2001.

Item 5. Other Events - On January 26, 2001, the Georgia-Pacific Corporation (the "Company") issued a press release announcing the financial results of the Georgia-Pacific Group for the fourth quarter and full year 2000 results.

On January 26, 2001, the Company also issued a press release announcing the financial results of The Timber Company for the fourth quarter and full year 2000 results.

Item 7. Financial Statements and Exhibits.

Item 9. Regulation FD Disclosure.

Also during the first quarter of 2001, the Corporation filed a report on Form 8-K on March 2, 2001.

Item 5. Other Events - On March 2, 2001, the Company issued a press release regarding the completion of the sale to Svenska Cellulosa Aktiebolaget SCA (publ) of the Company's commercial tissue manufacturing operations that were part of a joint venture with Chesapeake Corp. known as Georgia-Pacific Tissue LLC.

Item 7. Financial Statements, Pro Forma Financial Information and Exhibits.
