

AFTER TWELVE YEARS' EXPOSURE TO CORROSION

Here's a section from a panel of Hendrick Mitco, for twelve years exposed to atmospheric corrosion in an open yard of an industrial plant, and actually under water much of the time. Note that the joints show the least corrosion and have no crevices or cracks, although the side surfaces of the bars have been partially eaten away.

90% Open Area in Hendrick Open Steel Flooring

Permits maximum light and ventilation . . . Square-edge, uniformly spaced bars provide non-slippping, level walking surface . . . Pressure-formed integral construction obviates weaknesses of bolts, rivets and angle irons, and eliminates dirt-catching and light-obstructing projections . . . No lateral deflection of flooring, however heavy the load, because every Mitco panel is a strong, integral unit.

Hundreds of thousands of square feet of Hendrick Open Steel Flooring have given years of satisfactory service in factories, power plants, city subways, on shipboard, and in other installations where the free passage of light and air is essential.

Walking is Safer on Hendrick Shur-Site Treads

Ideal for stairs, ladders, fire escapes . . . Have level walking surface of Hendrick Open Steel Flooring . . . Heavy, flanged nosing-bar is additional safety feature, because it makes the edge of each tread clearly visible . . . It also gives extra reinforcement where load is greatest . . . Shur-Site Treads do not interfere with ventilation . . . Permit passage of light . . . Have no corners to collect dust and refuse . . . Wear for years.

Hendrick Armorgrids stand up under heaviest traffic

For floors, loading platforms, ramps, driveways . . . No traffic punishment is too tough for Hendrick Armorgrids . . . Shipped completely fabricated, they are easy and economical to install . . . May be used with fill of concrete, cement, asphalt, or composition material . . . Do not depend on the fill for development of full strength to resist shock loads . . . Never require rebuilding.

anybody seen any bare tracts?

BTU's are constantly hunting for bare areas where no insulation—or inefficient insulation—gives heat energy a chance to escape. When they find them (and they do find plenty even in modern plants!) look out, mister, look out! They blast away . . . there's buckshot galore . . . and careful cost estimates are shot full of holes! Dollars assigned to production of heat energy are wasted!

CAREY KEEPS BTU'S ON TARGET! The best way to keep BTU's firing straight at production goals is to take advantage of CAREY'S Com-

plete Industrial Insulation Service. Developed by over 60 years of helping industry locate and eliminate leaks in heat energy, it includes:

1. Practical engineering experience gained from detailed development of industrial insulation jobs of all sizes and shapes.
2. A complete line of industrial insulation materials, including—
**85% MAGNESIA, ASBESTOS,
INDUSTRIAL ROCK WOOL**
3. Materials strategically warehoused from coast to coast.

AVAILABLE TO HELP YOU! Carey's Complete Industrial Insulation Service is set up to give you everything from an insulation survey to a complete installation . . . to keep industry's BTU's on the job. Make full use of it at any time! Meanwhile you'll want to . . .

Write for your free copy of "Heat Insulation For Industry." This helpful booklet is an excellent guide to selection of industrial insulation—contains specifications and tables you'll want to keep handy. For your free copy address your request to Dept. PO-5.
