ASHRAE PUBLICATIONS

SYMPOSIUM BULLETINS

Papers presented at ASHAE Symposium Sessions have been collected, together with abstracts of floor discussions, into Bulletins. Such papers are seldom printed in TRANSACTIONS of the Society. Following Bulletins from recent sessions are available only while supply lasts at $1.50 each.

Industrial Ventilation — **Condensing Methods**
Thermal Insulation — **Hydronics**

WORKING CHARTS

Equilibrium Properties of Aqua-Ammonia .....25¢
Chart is 11¼ by 15-in. Reprinted from REFRIGERATING ENGINEERING, October 1950.

Low Temperature Psychrometric Chart .....25¢
Chart covers range from minus 20°F. to 50°F. Reprinted from ASRE DATA BOOK, 10th Edition, 1957-58, (8½- by 12⅜-in.).

Properties of Ammonia (Chart 7¼- by 18-in.) ..25¢
Bureau of Standards Mollier Chart, reprinted from ASRE DATA BOOK, 10th Edition, 1957-58.

APPLICATION DATA SECTIONS

ADS—19-R, OPERATION OF AMMONIA MACHINES .....50¢
revised by J. R. Chamberlain, York Corp. and by members of ASRE Technical Committee B-1, "Basic Equipment."
Contents: Basic principles; mechanical refrigeration cycle; classification; general erecting instructions; testing the system; charging the system; liquid refrigerant; capacity control; condenser pressures; evaporator pressures; starting and stopping; use of thermometers; purging the system; maintenance hints; is revision of an earlier ADS prepared by C. T. Baker. 10 pp. March 1948.

ADS—30, REFRIGERATION OF BANANAS .....35¢
by V. W. Ridley, Fruit Dispatch Company, New York.
Contents: Nature of product; shipment by rail; ripening rooms; systems of cooling; construction of rooms .....4 pp. Jan. 1942.

REFRIGERATION ABSTRACTS

A journal published 5 times each year by ASRE from 1946 through 1957. Now discontinued. Each issue contains condensations of all articles of refrigerating interest appearing in periodicals published throughout the world. Annual volume for each year from 1946 to 1957 inclusive, while supply lasts, ...each $14.00
Complete set, 12 volumes, 1946-1957 .....$50.00

CIRCULARS

#1—HOW TO WRITE AND PRESENT AN ENGINEERING PAPER .....45¢
by Dr. R. C. Jordan, Chairman, ASRE Education Committee.
A summary of "Aids to Technical Writing" (Bulletin 21, Engineering Experiment Station, University of Minnesota) and an elaboration of an earlier ASRE publication, "How to Write an Engineering Paper." Invaluable for a potential author for the Society's publications .....8 pp.

#4—CORROSION REPORT $1.00
A group of papers on various aspects of corrosion problems, four of which were presented at the ASRE Corrosion Symposium, Cleveland, Ohio. Tabular data and illustrations reprinted from ASRE Circular #10, "Corrosion in Refrigerating Plants" .....40 pp., June, 1943.

#7—BROCHURE ON PSYCHROMETRY $1.00
by D. D. Wile and E. P. Palmatier, Carrier Corporation, Syracuse, New York. Preprinted from Design Volume, ASRE DATA BOOKS.
Contents: Properties of air; the psychrometric chart; measurement of moist air properties; psychrometric tables and charts for low, normal, and high temperatures .....28 pp., 1947.

#8—REFRIGERANT TABLES, CHARTS AND CHARACTERISTICS $2.50
Reprinted from Design Volume of ASRE DATA BOOKS.
Contents: Tables and charts on 25 refrigerants 1959

INDEXES

REFRIGERATING ENGINEERING (ASRE) .....
.....1935-1940.....$1.00
REFRIGERATING ENGINEERING (ASRE) .....
.....1940-1945..... 1.00

ASHVE AND ASHAE TRANSACTIONS

Bound, cloth-covered, book published annually since 1895. ASHVE and ASHAE technical papers judged to have permanent value. Limited numbers of copies of each volume available. Volumes for years 1959, 1958, 1957, 1956, 1955, 1954, 1953, 1952, 1951, 1950, 1949 (each) $6.00
(Prices for volumes of earlier years quoted on request.)
1960 Transactions on sale at $6.00; special price to members $3.00

ASHRAE STANDARDS

Following list covers Society Standards available. All Society Standards are formulated and approved under the supervision of the Standards Committee. All are under constant review and revision. Availability of new Standards is announced by notice in ASHRAE JOURNAL.

(Complete set of all Standards listed, bound in attractive paper cover ....$12.50)

#12–58 REFRIGERATION TERMS AND DEFINITIONS*: (ASA B53—1958) $1.25

#13–58 HOME FREEZERS, METHODS OF RATING AND TESTING*: Covers self-contained freezers (ASA B38.3—1955) ....75¢

..... HOUSEHOLD REFRIGERATORS, METHOD OF COMPUTING FOOD STORAGE VOLUME AND SHELF AREA OF AUTOMATIC*: (ASA B38.1—1955) .....40¢

..... HOUSEHOLD ELECTRIC REFRIGERATORS (MECHANICALLY OPERATED) AMERICAN STANDARD TEST PROCEDURES*: (ASA B38.2—1956) .....75¢

#14–59 CONDENSING UNITS, MECHANICAL, METHODS OF TESTING FOR RATING $1.00

#15–58 SAFETY CODE FOR MECHANICAL REFRIGERATION*: Intended to insure safe design, construction, installation, operation, and inspection of systems using a fluid which is vaporized and normally liquefied in its cycle. Does not apply to water or air refrigerants nor to systems installed in transportation facilities.
(ASA B9.1—1958) $1.00

#16–61 ROOM AIR CONDITIONERS, METHOD OF TESTING FOR RATING: Prescribes a method of testing for obtaining cooling capacities and air flow quantities for rating room air conditioners $1.25

#17–48 EXPANSION VALVES, REFRIGERANT, METHODS OF RATING AND TESTING*: Thermostatic and constant pressure expansion valves passing volatile refrigerants.
(ASA B60.1—1950) $1.00

#20–60 EVAPORATIVE CONDENSERS, METHODS OF TESTING FOR RATING: Remote Mechanical-Draft Air-Cooled .....75¢

#22–48 WATER-COOLED REFRIGERANT CONDENSERS, METHODS OF RATING AND TESTING: Water-cooled industrial units .....75¢

#23–59 COMPRESSORS, REFRIGERANT, METHODS OF TESTING FOR RATING $1.00

#24–57 LIQUID COOLERS, METHODS OF RATING AND TESTING .....75¢

#25–56 AIR COOLERS FOR REFRIGERATION, METHODS OF RATING: Includes testing of forced circulation or natural convection air coolers for refrigeration, and simplified testing for operating conditions where frost would normally form on coil $1.00

#26–56 MECHANICAL REFRIGERATION INSTALLATIONS ON SHIPBOARD, RECOMMENDED PRACTICE FOR*: Guide for design, construction, installation, operation, tests and inspection of equipment on merchant vessels. (ASA B59.1—1958) $1.25

#28–57 CAPILLARY TUBES, METHOD FOR TESTING: Covers air flow capacity test for tubes used for refrigerant metering ..50¢

#29–56 ICE MAKERS, METHODS OF RATING AND TESTING: Covers automatic self-contained type only .....75¢

#30–60 LIQUID CHILLING PACKAGES, METHODS OF TESTING FOR RATING: For water-, air-, or evaporatively-cooled packages consisting of one or more: reciprocating compressors, liquid coolers, condensers, and necessary accessories and controls .....50¢

#32–57 BOTTLED BEVERAGE COOLERS, METHODS OF RATING AND TESTING: Self-contained mechanically-refrigerated coolers, vending and non-vending .....75¢

#33–58 AIR-COOLING AND AIR-HEATING COILS, FORCED CIRCULATION, METHODS OF TESTING AND RATING: For cooling coils used under non-frosting conditions only $1.00

#34–57 REFRIGERANTS, DESIGNATION OF: Numerically designates refrigerants for refrigeration services (ASA B79.1—1960) .....80¢

#35A–56 DESICCANTS FOR REFRIGERANT DRYING, METHOD OF TESTING: Desiccants only. For testing driers, see #35B-56 .....75¢

#35B–56 DRIERS, HIGH SIDE LIQUID-LINE, METHODS OF RATING AND TESTING: Applies only to driers for refrigeration systems using Refrigerant 12 or Refrigerant 22 .....$1.00

#37–60 UNITARY AIR CONDITIONING EQUIPMENT, METHODS OF TESTING FOR RATING $1.00

#38–57 COOLING TOWERS, MECHANICAL DRAFT, METHODS OF TESTING FOR RATING UNDER CONTROLLED CONDITIONS: For field tests see current ASME Power Test Code on Atmospheric Water Cooling Equipment .....75¢

#39–61 UNITARY HEAT PUMP EQUIPMENT, METHODS OF TESTING FOR RATING: Provides standard test methods for determining the cooling and heating capacities of unitary heat pump equipment $1.25

#40–61 HEAT OPERATED UNITARY AIR CONDITIONING EQUIPMENT FOR COOLING, METHODS OF TESTING FOR RATING: Provides standard test methods for determining the cooling capacity of unitary heat-operated air conditioning equipment $1.50

#45–55 HEAVY DUTY FURNACES AND DIRECT-FIRED UNIT HEATERS, CODE FOR TESTING AND RATING: Code describes apparatus and procedure for testing and rating forced warm air furnaces and direct-fired unit heaters having output ratings in excess of 250,000 Btuh. Adopted 1955 by ASHAE .....50¢

* Indicates that the Standard has been approved as an American Standard—and the ASA designation assigned to it is shown.
