

The Home of Oklahoma's Historical Society

The Oklahoma Historical Society, Bldg., Oklahoma City, Okla. Architect: Leighton, Hicks & Forsyth of the same city. Assembly room and corridors painted with three coats of Dutch Boy White-Lead by J. E. Long, contracting painter of Oklahoma City.

... again demonstrating DUTCH BOY'S advantages

Add to the list of important buildings throughout the country on which Dutch Boy White-Lead is used, this stately, new \$500,000 home of the Oklahoma Historical Society.

No matter where you may be... in large city or small...there you are sure to find Dutch Boy jobs...jobs that prove how good paint can really be.

Paint for interiors must be more than good-looking paint. It must be long-wearing and washable as well. Paint made with Dutch Boy White-Lead and flattening oil meets every requirement of beauty and durability and, in addition, it is thoroughly washable.

White-Lead can be used for painting every type of surface—wood, plaster, wall board, fabric,

masonry or metal. It can also be used to obtain durable, resplendent finishes... undercoating for enamels... mottled and figured effects... and to produce the plastic paint that gives low-relief textures. Paint made with Dutch Boy White-Lead and flattening oil can be tinted to any desired color.

From the owner's standpoint, this adaptability means economy. To the architect, it means a saving in time and trouble. To the painter, it is a sure means of producing quality jobs.

The National Lead Co. maintains a Department of Color Research and Decoration to assist architects and others with painting and decorating problems. Service is free. Address this department, care of nearest office.

DUTCH BOY WHITE-LEAD

NATIONAL LEAD COMPANY
