Re: Medical and Health Service

Dear Mr. Thomas:

In our opinion, it would be advisable to give consideration towards the establishment of a medical clinic in Kansas City. This is the only spot where we have a group of people, any ways near 300 or over, with the exception of Augusta. There, no doubt, will be such a clinic in the refinery, and it might be advisable to combine our Wichita operation with them in order to extend such benefits to a reasonably large group of marketing people in that area.

Yours very truly,

E. F. KENDALL
