Mr. Guy Bauman
Pittsburgh Corning Corporation
One Gateway Center
Pittsburgh 2, Pennsylvania

Dear Mr. Bauman,

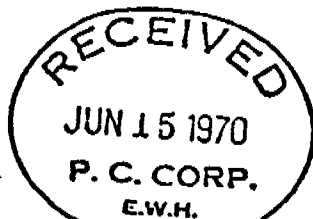

Confirming our telephone conversation of yesterday, we are arranging with our Mines in South Africa for one ton Grade K3, palletized, to be forwarded to both your Port Allegany and Tyler plants during the month of July. The cost of the fibre will be absorbed by the Mines, and you will only have to pay the normal ocean freight and handling charge on these two one-ton lots.

Also, as discussed, we will arrange to release from warehouse stocks in Philadelphia one ton each Grade M to be shipped to Port Allegany and Tyler. This material will be supplied free of charge, f.o.b. dock warehouse. We anticipate both of these one-ton lots will leave the warehouse in Philadelphia early next week.

After your plants have had an opportunity to examine both the Grade M and the K3, when it arrives (probably sometime in late August or early September), we would appreciate receiving their comments.

Sincerely,

NORTH AMERICAN ASBESTOS CORPORATION
