

The American

Ceramic Society Bulletin

PLAINTIFF'S
EXHIBIT
WCD-80

October, 1956

OFFICERS

President

Karl Schwartzwalder
Flint, Mich.

President-Elect

John F. McMahon
Alfred, N. Y.

Vice-Presidents

Oscar G. Burch
Toledo, Ohio

Louis Navias
Schenectady, N. Y.

C. W. Planje
Los Angeles, Calif.

Treasurer

Andrew Pereny
Columbus, Ohio

Editorial Secretary and Editor

Charles S. Pearce
Columbus, Ohio

Committee on Publications

C. H. Hahner
Chairman

W. R. Kerr

J. O. Everhart

E. P. McNamara

C. S. Pearce (ex officio)

Managing Editor

James S. Welch

Editorial Assistants

Emmoline R. Jamra

Mary Weigelt Rohr

Charlotte B. Burgess

Advertising Manager

Arthur S. Koschny

Eastern Representative

William T. Mohrman, Jr.

501 Fifth Ave.,

New York 17, N. Y.

Phone: Oxford 7-2369

Midwest Representative

James K. Millhouse

5124 West Irving Park Rd.

Chicago 41, Ill.

Phone: Mulberry 5-0070

Offices

Executive, editorial, and advertising: 4055 North High St.,
Columbus 14, Ohio.

Phone AMherst 8-8645

A. T. & T. Teletype CL593

Publication: 20th & Northampton Sts., Easton, Pa.

Papers

Petrology of Fused Alumina Abrasives.....	387
H. N. Baumann, Jr.	
Influence of Selected Factors in Evaluating Dielectric Strength of Porcelain.....	391
Lee A. Shearouse, D. L. Heath, and W. J. Smothers	
Use of Wollastonite in Artware Bodies.....	396
Thomas L. Stalter	
Development of Sewer Pipe Glazes from Volcanic Materials...	399
Ian O. Knizek	
A Recording Differential Thermal Expansion Apparatus.....	402
Stephan P. Mitoff and Joseph A. Pask	
Role of Patents in Development and Research.....	405
O. E. Williams	

Articles

High-Temperature Electronics at General Electric.....	407
Report of the Research Committee.....	408
Nominations for Officers.....	416

Rosters

Membership Roster.....	417
Institute Roster.....	R-121

Departments

In Print for Ceramists..	2	Advertisers' Index....	12
Mailbox for Readers..	4	Names.....	410
Meetings Calendar....	6, 7	Authors.....	412
Out of the Kiln.....	R-125	Necrology.....	414
Men & Positions.....	11	Sections.....	415
Consulting Services..	R-126		

Membership Roster

The American Ceramic Society

This Roster of members is published only for the use of members of The American Ceramic Society. Listings are in alphabetical order. A separate Roster for the National Institute of Ceramic Engineers, showing grades of membership, is on pages R-121 to R-125 of this issue. New members received too late to be included are listed in the Addenda on page R-120.

These listings give the member's preferred mailing address. Where this is not his business address his company connection is shown in parentheses. Divisions and other Society affiliations are indicated in parentheses following each name, in accordance with the code given below. The absence of any such designation indicates that the member is from outside the United States or a student member, neither of which has Division affiliation.

B—Basic Science Division
D—Design Division
E—Enamel Division
G—Glass Division

M—Materials and Equipment Division
R—Refractories Division
S—Structural Clay Products Division
W—White Wares Division

X—No Division affiliation
F—Fellow of The American Ceramic Society
J—Junior Member
I—National Institute of Ceramic Engineers

Out of the Kiln

High Temperature Furnaces: Harper Electric Furnace Corp. has announced the availability of continuous carbon tubular element furnaces with tube sizes up to 6 in. I.D. In addition to increased tube sizes, the new furnaces feature continuous operation with automatic mechanical pusher, entrance preheating chamber, and water-cooled cooling chamber.

Expansion: The Robinson Clay Product Co., Akron, Ohio, is expanding its Mogadore, Ohio, plant to provide additional facilities for the production of Wedge-Lock Clay Pipe. Installation of automatic equipment, including overhead chain conveyor and plastisol curing ovens, will enable the Mogadore plant to produce approximately 1200 tons of Wedge-Lock Clay Pipe monthly.

Shielding Study: Walter Kidde Nuclear Laboratories, Inc., consultants on applications of nuclear technology, has been awarded a contract by the Corps of Engineers' Research and Development Laboratories, Fort Belvoir, Ill., to prepare a "field expediency shielding study."

Acquires Plant: Fischer & Porter Co., Hatboro, Pa., has announced the purchase of the Andrews Glass Co., Inc., Vineland, N. J. Andrews which manufactures laboratory and technical glassware will be operated as a wholly-owned subsidiary of the parent company.

Movie on Tile: Pomona Tile Mfg. Co. has begun a series of showings of its half-hour motion picture, "Quality in Tile," for architectural and builders groups and tile contractors. The film shows the production of ceramic tile from the mining of talc through the manufacturing plant and to the customer.

Sewer Pipe: Greater structural strength and impermeability for sewer pipe can be obtained by using ceramic glazes, according to Pemco Corp., Baltimore, Md. In a test of structural strength measurements, using an index of 100 for the normal amount of strength necessary, an independent source rated the various finishes as follows: salt glazed pipe (75); vitrified unglazed pipe (100); and ceramic glazed pipe (125).

New Standard: To increase the accuracy of pH measurements in the highly alkaline range, the National Bureau of Standards is recommending a sixth pH standard for use along with the five pH standards previously established. Consisting of a saturated solution of calcium hydroxide, the new standard will provide an additional fixed point in the standard pH scale which the Bureau maintains.

Office Moved: H. R. Deeth, vice-president and sales manager, American Nepheline, Ltd., has announced the opening of a new sales office for "Lakefield" Nepheline Syenite, at room 2530, Canadian Bank of Commerce Building, 25 King St. W., Toronto, where Mr. Deeth will be located. The sales office at Lakefield will be closed with this move.

Material Handling Films: The Material Handling Institute, Inc., Suite 759, One Gateway Center, Pittsburgh 22, Pa., has published a compilation of material handling films available from member companies.

Distributor: Whittaker, Clark & Daniels will represent the Aquadyne Corporation of Clark, N. J., as distributor for Aquadyne and Hydrodyne. These are highly concentrated, multiphase wetting agents designed for specialized industrial uses.

Cleaning Masonry: A new solution which can be used as a substitute for muriatic acid in removing lime and mortar from brick and other masonry work has been developed by Berman Chemical Co., Toledo, Ohio.

Donald R. Smith, Ralph Fry, and Vaylord R. Luster have been added to the Sales and Service Staff of the Frit and Glaze Division of Ferro Corp.

Frederick G. Stroke has been appointed manager of operations in charge of engineering development and sales of products in the field of nuclear energy and rocketry for the Bettinger Corp., Waltham, Mass.

Corning Glass Works has announced two appointments in its Consumer Products Division. **John M. Bredfeld** has been named manager of the Pyrex ware sales department and **Daniel J. Lammon**, manager of the specialty sales department.

William E. Grove, Jr., has been named assistant plant manager of the East Broadway plant of Libbey-Owens-Ford Glass Co.

William G. Tuscany will head sales of the newly created Semi-Conductor Section of Centralab, Division of Globe-Union, Inc., Milwaukee, Wisc. **Earl Clemick** will handle sales of Packaged Electronic Circuits vacated by Tuscany.

Bruno H. Wojcik has been named manager of research and development for the Industrial Chemicals Division of Olin Mathieson Chemical Corp. Dr. Wojcik will be located in Baltimore. **Bernard H. Nicolaisen** has been appointed assistant manager of research and development in charge of the division's laboratories at Niagara Falls, N. Y., and **Chester White** will supervise the Rochester, N. Y., laboratories, formerly the Genesee Research Corporation.

William K. MacCurdy, Menlo Park, has joined Thermo Materials, Inc., as vice-president in charge of engineering.

Kaiser Dedicates Columbiana Plant

Kaiser Aluminum & Chemical Corp. dedicated its new basic refractories plant at Columbiana, Ohio, on September 29, marking an important milestone in the growth of its Chemicals Division.

The affair became a community celebration as thousands of local residents turned out for the plant tours conducted during the morning and afternoon. Over 1500 pounds of beef were served at a public barbecue held at noon in Firestone Park.

Among company officials participating in the brief dedication ceremony which climaxed the day's activities were: E. W. Adams who will serve as plant manager at Columbiana; D. A. Rhoades, vice-president and general manager, Kaiser Aluminum & Chemical Corp.; and Frank M. Cashin, vice-president and manager of Kaiser's Chemicals Division.

The Columbiana plant took 20 months to construct and cost nearly \$5 million. It covers more than three acres and is located on a 185-acre site on the main line of the Pennsylvania railroad and within a few miles of the Ohio-Pennsylvania Turnpike. According to Mr. Cashin, the location will

Administration building at the Columbiana operation. The plant building is in the background at the left.

The first pallet-load of basic refractory brick is pressed as operations begin at Kaiser's Columbiana plant.

make it possible to shorten delivery time in some cases by as much as 14 days.

Periclase and chrome ore are the two raw materials used in the basic refractories produced at the plant. Periclase is supplied from Kaiser Chemicals Division's raw materials plants in California, while chrome ore is imported from the Philippine Islands.

The plant has facilities for receiving and storing raw materials; grading, drying, classifying and mixing ingredients; pressing, drying and burning brick; checking and shipping finished products. Other facilities include an extensive laboratory for quality control, machine shop for servicing the plant, and a separate administration building.

Kaiser first began making refractories in 1943 at a small plant in Milpitas, Calif. These facilities, recently expanded and modernized, are now devoted to refractory research. After the war, a new refractory brick plant was constructed near its seawater plant at Moss Landing.

Both the Columbiana and Moss Landing plants are included in an additional \$3 million expansion program planned by Kaiser. New equipment for Moss Landing will double the present seawater handling capacity and will increase by 50% its capacity to produce periclase.

New equipment at Columbiana will include additional pressing and materials handling facilities, which will increase the plant's capacity by 50%. When the installation is completed by the end of the year, the plant's annual capacity for basic brick, aside from ramming mixes and furnace grains, will be 48,000 tons. Ultimately, the Columbiana plant will produce 110,000 tons of refractory products per year.

● **Inventors:** A supplementary list of 35 new technical problems for the attention of the nation's civilian inventors has been published by the National Inventors Council, U. S. Department of Commerce, Washington 25, D. C. An inventor who has a proposed solution to one of these problems can submit his idea to the Council which will evaluate it and, if it is practicable, present it to the proper military agency.
