now that. Loren Choute, their Gen. Mgt., says
that Letto are buying some of the fibrous
grades (this is a reversal of his previous story) at
one of their plants, & are using 25% of the fibrous
material mixed with the other grades. Also does
it see how they could give us exclusivity in
view of the fact that Letto (& others) are using these
grades. Incidentally, the B-1 Extension is P.T.
