

Metal plating and manufacture of metal products (Annex E.2.4.)			
Sub sector	Proposed derogation or derogation for reconsideration	Duration of derogation period, including substantiation	Cost impact of 5 and 12 year derogation periods
Manufacture of metal products not addressed elsewhere	Given the sufficiently strong evidence that technically and economically feasible alternatives are not available at EiF, a derogation is proposed for: Globe control valves for volume flow control in the metall-processing and chemical industry	Not applicable, since there are no adequate substitutions for the discussed materials and the given applications	A cost impact can not be estimated, since a derogation period is not applicable
Electronics and semiconductors (Annex E.2.11.)			
Sub sector	Proposed derogation or derogation for reconsideration	Duration of derogation period, including substantiation	Cost impact of 5 and 12 year derogation periods
Semiconductors	Given the sufficiently strong evidence that technically and economically feasible alternatives are not available at EiF, a derogation is proposed for: Globe control valves for volume flow control in the semiconductor industry	Not applicable, since there are no adequate substitutions for the discussed materials for the given applications	A cost impact can not be estimated, since a derogation period is not applicable
