Monsanto

FROM (NAME & LOCATION) J.R. Savage - St. Louis - B2SL

DATE : September 20, 1974 cc: A.E. Leisy - 1740

SUBJECT : Aroclors Handling Bulletin

REFERENCE :

TO W.D. Lubic B1NB

Chapter 2 "Storage Tanks" of the subject bulletin is totally obsolete -- it reflects Anniston design practice from the 1940's rather than the much more trouble-free Krummrich hardware now in use. Likewise the storage tank drawings in the back of the book are 1940 vintage. The discussion of pump packing in Chapter 3 should be updated to include mechanical seals.

Ken Boucher at the Krummrich Plant can be your contact on the details.

or AEL

Can we get your approval for Bill Lubic to work with Ken Boucher to rewrite Ch. 2 & 3 as well as updating storage tank drawings.
