Pittsburgh Corning Corporation
Research and Engineering Center
800 Presque Isle Drive
Pittsburgh, Pennsylvania 15239

Attention: Mr. John L. Hyde

Dear Mr. Hyde:

We have received your letter of June 23, 1969 wherein you advised that you were sending approximately 1000 lbs. of Unibestos scrap for testing.

In view of the unknown quantity of the material as to toxicity, we will be unable to test this material. Our only testing facilities are set up in our regular shop where men are working every day and, therefore, we cannot subject our employees to a toxic material.

When the material is received, we will examine it visually and perhaps we might be able to determine whether or not the material can be conveyed. We might inform you that we handle shredded asbestos in live bottom bins without any problems and we will examine your material and will be in touch with you at that time.

We trust you will understand our position in this matter and assure you of our cooperation in all possible ways, we remain

Yours very truly,

HIGHLY CONFIDENTIAL
SUBJECT TO PROTECTIVE ORDER
