

908-DIESEL TACHOMETERS (Cont.)

DIESEL TACHOMETER GENERATOR 3-5730

A sealed unit rotating magnet, fixed coil, digital pulse type with no brushes or contacts. Equipped with unique spring drive tongs to fit standard round SAE drives and includes extra long tong for mating with the standard square SAE drive.

3-5731 Generator extension provides clearance for certain Mack trucks.

DIESEL TACH DISPLAY

DIESEL TACH DISPLAY 3-5735

An attractive easel type counter display merchandiser containing

- 1 3-5704 Tachometer and
- 1 3-5730 Tach Generator

NOTES:

1. Select a lower RPM Tach-Head if the engine will always be operated at lower speed.
2. Some engine models (Allis-Chalmers, International Harvester) require addition of an angle-drive (if not already installed) for mounting the Tach Generator. This can be procured from engine supplier.
3. On G.M.C. and Detroit engines equipped with an angle-drive, the angle-drive must be removed. Mount Tach Generator directly to engine.
4. Mack engines with Tach-drive located on right hand front of engine require Number 3-5731 Tach Generator Extension.
5. If addition of an engine hour meter is desired, install an electric type (except that a mechanical type may be installed on the angle-drive of Caterpillar engines, if desired.)
