Hilites - July, 1972

Santicizer 334F

Santicizer 334F has been approved for a new use - operating room drape film. Potential 80 M lbs./year.

Phosgard 2XC-20

Production and customer shipments reached all time record highs of 581 M pounds and 509 M pounds respectively. We are now making bulk shipments to several customers. We continue to remain in a sold out position although we have completed all backorders to date. Shipments to customers for the year to date have passed the 1 $\overline{M}$ pounds mark.

Plasticizers and The Environment

The MCA Ad Hoc Planning Committee is circulating their report of phthalates. General conclusions are that phthalate esters are safe when administered orally and do not present an industrial hygienic problem.

Paul Graham (Chairman of the MCA Committee) will participate in a symposium sponsored by the National Institute of Environmental Health in September.

Santoset I

W. R. Grace plans to purchase this product in bulk. Use: the manufacture of battery separators.
