Subject: BPA-218-73 Bag Packer Dust Collection System - Joint Cement, Akron, New York Gypsum Plant, Fan System No. 10

Dear Mr. Johns:

Enclosed are the necessary forms and drawings for our application to install an exhaust system for the above subject. Our original application for this system was disapproved by your department on July 6, 1973, due to the fact that the drawings did not contain sufficient details.

With reference to our proposed Fan System No. 9 for the bag slitter vent hood, we have deleted this item because we are now obtaining air velocities of 275 feet per minute across the face of the hood. Your vent requirements for this area were 200 feet per minute. The increased velocity was accomplished by totally enclosing three sides of the vent hood.

If additional details or documentation is required, please feel free to contact me at the Portland office.

Sincerely,

George Turner

4. Air contaminant emissions to outer air; list by contaminant name and indicate whether contaminant is (s) solid, (l) liquid, or (g) gas. Describe color and/or odor of visible and/or odorous contaminants.

Contaminant	Quantity (lb/hr)	Contaminant	Quantity (lb/hr)
Joint Cement Dust (white, odorless)	0.04		

Describe method for determining emissions:

Estimate 40 Lbs/Hr of Joint Cement Dust to 99.9% Efficient Cyclone & Baghouse

Emissions: (40 Lbs/Hr) (0.001) = 0.04 Lbs/Hr

5. Air or gas flow rate

If cyclic, SCFM/cycle _____; hrs/cycle _____; cycles/yr

If continuous, SCFM 3650; hrs/day 20; days/yr 340 (Average)

6. Physical characteristics of emission point

a. gas temperature at point of discharge: 70° F.

b. inside dimensions of outlet 12 in. x 13½ in. or _____ in. diameter

c. height above ground 14'6" ft.

RECEIVED ... 1973

7. Fuel (complete if fuel used as a process constituent) "Not Used"

a. Coal (Type) Anthracite_____; Bituminous_____; lbs/hr._____ %Sulfur by Wgt._____

b. Oil (Grade) 2_____ 4_____ 5_____ 6_____ GPH_____ %Sulfur by Wgt._____

c. Gas (Type) MFD_____; Nat._____; _____CFH; _____BTU/CF

8. Is this a new or existing source? New

9. If existing, has an environmental rating been certified for this emission source?

Not Applicable

0. If yes, give "E" number assigned_____

EXHAUST SYSTEM PLAN

PLAN NO.
DATE REC'D. / /
FEE REC'D.

FILING INSTRUCTIONS - ONE COMPLETED COPY OF THIS FORM MUST BE FILED FOR EACH FAN SYSTEM IN THE EXHAUST PLANS BEING SUBMITTED. Forward exhaust system plans IN TRIPLICATE, together with one completed copy of this form for each fan system, to the Engineering Section of the Division of Industrial Hygiene at one of the following Department of Labor Offices. Plans for exhaust systems to be installed in the counties of Cattaraugus, Chautauqua, Erie, Genesee, Livingston, Monroe, Niagara, Ontario, Orleans, Wayne, Wyoming and Yates should be sent to: 2447 SHERIDAN DRIVE, TONAWANDA, N.Y. 14150. Plans for exhaust systems to be installed in counties other than those listed above, should be submitted to: 80 CENTRE STREET, NEW YORK, N.Y. 10013.

IMPORTANT: Effective June 1, 1963, the Industrial Commissioner is required by section 204-a of the Labor Law to charge a FEE FOR THE EXAMINATION OF EXHAUST PLANS. Please forward with the plans a check or money order payable to the Industrial Commissioner, in accordance with the following fee schedule FOR EACH FAN SYSTEM:

CATEGORY A

"Simple single booths and enclosures, such as spray booths; canopy hoods; dilution, general and natural draft ventilation systems".

Design CFM	Fee
less than 5,000	$10
5,000 or more	20

CATEGORY B

All systems other than category A.

Design CFM	Fee
less than 250	$10
250 or more but less than 1,000	20
1,000 or more but less than 5,000	30
5,000 or more but less than 10,000	40
10,000 or more	50
