NEW YORK 17, N. Y.

RED LEAD DIVISION

October 21, 1949

SUBJECT: IRON AGE ARTICLE,
PAINTS FOR STEEL MEMBERS IN
HOUSING CONSTRUCTION

To The Members Of The Red Lead Technical Committee:

The enclosed article on paints for structural members for steel housing construction appeared in the October 20 issue of IRON AGE magazine. This is a condensed version of the lengthy progress report published in May of this year by the American Iron and Steel Institute, sponsors of this project. It contains all of the essential facts presented in the original 46 page report sent to you earlier.

The original lengthy report was distributed by the Lead Industries Association to approximately 13,000 architects, engineers and paint men. In order to give this information, so favorable to red lead and from an unbiased source, even wider publicity the report was rewritten, with the permission of the authors and sponsors, and submitted for publication in IRON AGE.

You may want to distribute reprints of this article through your technical service and sales departments. If you plan to do this we would like to know your approximate requirements as soon as possible so that we can anticipate our total needs for reprints in a single order and obtain them at the lowest possible cost.

Very truly yours,

C. J. Vander Valk
