Re: Boiler Stack F 1001
Boiler Stack Insulation
El Paso Refinery

Dear Sir:

In response to your invitation dated Oct. 5, 1966, we are pleased to quote the above referenced work as follows:

1 - Furnish and install $1\frac{1}{4}$ " x $1\frac{1}{4}$ " x $\frac{1}{4}$ " angle support rings at approximately 9'0" O.C., securely welded.

2 - Furnish and install $1\frac{1}{2}$ " thick JM "Thermobestos" calcium silicate block insulation, or equal. This to be banded with $\frac{3}{4}$ " stainless steel bands in lieu of 16 ga. black annealed wire.

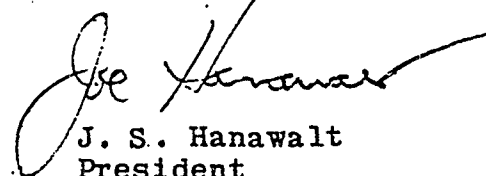

3 - Furnish and install .024 mill finish aluminum jacketing, banded with $\frac{3}{4}$ " stainless steel banding at lower edge and mid span of 36" continuous sheet. The joint at laps - both horizontal and vertical - to be secured with sheet metal screws approximately 4" O.C.

The work as proposed to be done with spider staging furnished by us, with initial stringing of painters trolley to be done by Standard Oil Co.

The price for the above work to be \$4,842.00. If poly clad .024 aluminum jacketing is to be provided, add \$111.00 to the above price. The thirty day completion time is adequate.

Yours very truly,

JACK WHISLER, INC.
