

A CUSTODIS CHIMNEY INSPECTION

**COSTS
SO LITTLE
...and
may save
you so much!**

How long since your chimney has had a thorough checkup? A Custodis checkup NOW may detect unsuspected conditions that might lead to costly interruptions, plant shutdowns, expensive repairs later.

For over 30 years we have specialized in the maintenance of radial brick, common brick and reinforced concrete chimneys.

For a nominal fee of \$10 a Custodis Field Engineer will give you an honest report on the condition of your chimney, together with the most economical recommendation for repairs. Generally, we can make such repairs without closing down the chimney. Custodis repairs often add many years of useful chimney life and avoid costly reconstruction.

Write or call us TODAY and we will be glad to arrange for a Custodis Engineer-Inspector to visit your plant.

REACTORS

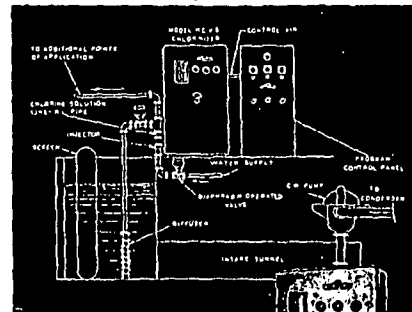

Designed for clarification of industrial water, pretreating of boiler
feed water and recovery of paper fibre and filler from waste water.
Cochrane Reactors combine basic elements of equipment for mixing,
the formation, settling, and thickening in a single reaction vessel.
Clarification is faster—chemical reactions more complete, producing more
usable water at considerable savings in chemical costs. Chemical
reactions and separation of suspended solids are so rapid that only
a fraction of time is necessary as compared with old-fashioned cold
thruco settlers. Publication 3001-6.

Slime Control IN COOLING SYSTEMS

Chlorination — the modern way
to prevent slime buildup in con-
densers and heat exchangers —
saves you money if it's right. But
if dosage is too heavy, you run the
risk of corrosion... or if it's too
light, chlorination is worthless.

Builders Chlorinizer is the key to safe, effective,
economical chlorination in cooling systems. CHLORIN-
IZER IS ACCURATE... The sensitive compensating
valve and the visible-flow Sightflow Indicator guarantee
correct feed for effective treatment and insure against
corrosion. CHLORINIZER IS SAFE... The full vacuum
principle automatically and positively shuts off chlorine
feed on loss of vacuum. CHLORINIZER IS SIMPLE
... Because of its basic design, Chlorinizer is readily
adaptable to single or multiple point applications on
manual, semi-automatic, or fully automatic control.

Builders Chlorinizers are available in three volu-
metric models for feeding from a few pounds to 6,000
pounds per day. Send coupon for complete details.

BUILDERS-PROVIDENCE, INC.

(DIVISION OF R.I.F. INDUSTRIES)
