8/18/ TL Xerox cc's Goodacre Wm Rickard (2) - return HSB (3) - Xerox cc to Bill Papageorge Bill - pls note my comments/questions in your draft HSB

Attached is a proposed draft of the toxicity summary to be included in a Monsanto statement on PCBs.

This version includes all comments received from the Business Group. It acknowledges awareness of Dr. Kimbrough's work, describes our re-examination of specimens from our study and concludes that our studies do not show carcinogenicity. It does not attempt to do the rationalization for the regulatory agencies nor does it refer to any agency interpretations or actions.
