VDC-1

Record of Conference Call
Vinylidene Chloride Panel

Date: June 3, 1988

Time: 2:30 p.m.

For Distribution by
SPECIAL PROGRAM
From: *Dean*
No. *222/1/4*
5/20/88

Participants

Z. Bell, Chairman	PPG Industries
➔ J. Barder(sp)	PPG Industries
J. Norris	Dow Chemical Company
B. Dickson	Paul, Hastings, Janofsky, Walker
E. Moran	CMA
R. Romano	CMA

Unavailable

S. Hearn Dow Chemical Company

- 1.0 Dr. Romano announced a change in program management. E. Moran will be the new program manager.
- 2.0 Submission of industrial hygiene monitoring data to EPA was discussed. EPA needs the data by mid-June to avoid a TSCA Section 4 Rule. PPG's data are compiled; Dow is still in the process of compiling data. PPG will provide data to CMA (using the geometric average values). The preference is to submit data as a Panel.
- 3.0 Dr. Norris will let CMA and PPG know the status of Dow's data collection. CMA will transmit data from both companies or data from PPG (if Dow data are unavailable) to EPA in mid-June.
- 4.0 The Panel discussed other potential activities involving VDC. They include development of a toxicological profile (under SARA Title I) and listing under Proposition 65 in California. The Panel agreed that it would follow the toxicological profile activities.

SL 061842

5.0 A planning meeting was scheduled for August 16, 1988. At that time additional commitments will be needed to support legal and administrative activities (the Panel is currently in the red \$7,000).

Elizabeth J. Moran, Ph.D.
Manager, Vinylidene Chloride Panel
