# SIMPLIFIED COLOR MIXING

It is now possible to make  
the colors in this part not  
only accurately but quickly.  
When only one color is  
all is called for, accurate  
mixing is simply a matter  
of adding to the white base  
the amount specified in  
the formula, and mixing  
in a tank until the desired  
color is obtained.  
When two or three colors  
are needed to produce a color, the new  
system provides a way to  
check each step. The first  
color is added, and a  
control color is checked, then  
the second, and so on, until  
the color is obtained, then the  
(Over)
