Mr. Fred M. Comar, Chief Metallurgist
Chevrolet Motor Division
P.O. Box 460
Massena, New York 12662

Dear Fred:

The letter you sent to Roy Ehrhardt at our New York office has been forwarded to me.

Chlorinated Biphenyls refers to a family of products, some of which are used in our Pydraul product line. Pydraul A-200 does contain chlorinated biphenyl, however, we have no evidence that the particular chlorinated biphenyls used in Pydraul A-200 are highly toxic to aquatic life.

Monsanto has many studies underway (some for over a year) to determine the effect of the entire chlorinated biphenyl family on our environment. Once these studies are completed we will be able to comment further. We hope to have sufficient results in the first quarter of 1970.

Sincerely yours,

N. T. Johnson
Marketing Manager
Industrial Fluids
