

Curtis Refrigerating Machine Division

of Curtis Manufacturing Company
1959 Kienlen Ave., St. Louis 20, Mo., U. S. A.
ESTABLISHED 1854

NEW YORK OFFICE
30 VESEY ST.

CHICAGO OFFICE
9 S. CLINTON ST.

Full Line of Units from 1/4 to 40-hp. Unit Coolers, Air Handling Units, Evaporative Condensers, and Cooling Towers

PRODUCTS: Complete Refrigerating Equipment for Dairies, Creameries, Ice Cream Cabinets, Ice Cream Making Plants, Cold Storage Locker Systems, Walk-in Coolers, Drinking Water Systems, Commercial and Low Temperature Cooling, Processing and Air Conditioning Installation, Packed and Remote Types.

Combination air and water cooled Condensing Units.
1/2 Through 2 hp.

1 1/4 hp Air Cooled Condensing Unit. Other sizes from 1/4 to 3 hp.

15 hp Cleanable Shell and Tube Condensing Unit. Other Sizes from 7 1/2 to 40 hp.

Year-round Cooling and Heating Unit—3 and 5 tons

Commercial Refrigeration

Air cooled condensing units from 1/4 to 3 hp, inclusive, combination air and water cooled units from 1/2 to 3 hp, inclusive, and water cooled units from 3/8 to 40 hp, inclusive. All models charged with Freon 12 refrigerant. Mechanical advantages include Timken Bearings, Positive Pressure lubrication. Special models are available for ice cream, frozen food cabinets and for the dairy industry.

2, 3, 5, 7 1/2 and 10 ton Packaged Type Air Conditioner.

10-15 ton Remote or Central Type Air Conditioner.

Air Conditioning

For today's Air Conditioning requirements Curtis offers complete packaged, refrigerated air conditioning units, requiring only water and electrical connections to install. Cools, dehumidifies, circulates and filters the air. Eliminates costly installation expense. Adaptable for heating.

AIR CONDITIONING

Complete Frick Systems; also refrigeration for use with equipment supplied by others. Thousands of installations attest the value of Frick air conditioning. Successful experience with exacting commercial and industrial jobs since 1910 enables us to solve your problems.

FREON-12 REFRIGERATION

Frick low-pressure units, "ECLIPSE" machines, and the larger enclosed F-12 compressors provide a complete and efficient line. Air conditioners, coils, coolers, condensers and controls to suit. Patented Flexo-Seal at shaft, pressure lubrication from reversible pump, capacity controls, and other unique features make Frick machines your logical choice.

See Frick Bulletin 603 on air conditioning for hospitals, 603 on ammonia systems, 604 on typical installations, 605 on engineering details, and 623 on unit conditioners (illustrated).

Frick "ECLIPSE" Compressors. Bulletin 100.

Combined Unit with "ECLIPSE" Compressors. Bulletin 100

Enclosed Ammonia Compressors. Bulletin 112.

Low Pressure Refrigerating Units, Open drive or Accessible Hermetic Types. Bulletins 97 & 402.

AMMONIA REFRIGERATION

Combined units and vertical enclosed compressors, with two or four cylinders, in sizes from 2 1/2 tons up. Also "ECLIPSE" compressors for ammonia, with 3, 6, or 9 cylinders. Widely used for air conditioning, with material savings. Ask for Bulletins 100 and 603.

Two Frick 5 1/4 x 3 3/4 "ECLIPSE" Compressors air conditioning an office building. Driven by 300 hp, 1200 rpm motor mounted between them.
