any bays?

A No.

Q Back then they didn't have bays in that garage?

A No.

Q And what about lifts?

Were there any lifts that they had back there?

A No lifts.

Q Now, you as a mechanic had an opportunity to change brakes there; is that correct?

A Yes.

Q Can you describe for us -- when you worked back in the 1940s, as well as in the '50s, can you describe how you would do a brake job then, starting with the first thing you would have to do with a vehicle?

A The first thing you would have to do is raise the vehicle, jack it up and secure it for safety.

Remove the wheels, remove the brake drums
