Mr. H. E. Palm
Plant Manager
Raybestos-Manhattan Incorporated
Manheim, Pennsylvania

Dear Mr. Palm:

This is in reference to a research project being conducted by the University of Pittsburgh, Graduate School of Public Health and the Ohio Department of Health. In addition to research relative to a sampling of all employed workers in the United States, relative to mortality, we are also conducting an epidemiological study of workers exposed to asbestos.

We would appreciate your help in supplying us with the dates of employment of the following individuals whom we learned were former employees of your company.

We are particularly interested in employment data prior to 1937. The names and identifying data is attached on a separate sheet, and we would appreciate it very much if you will complete the employment data and return to us in the self addressed envelope.

Thank you for your cooperation.

Sincerely yours,

Thomas F. Mancuso, M.D., M.P.H.
Chief, Division of Industrial Hygiene
