ALLIES

No picture which has been made—C. P. Jones, C. P. Jones, and many others—has been so good as the first Dutch Boy line. We make them all, each under high-grade in every respect.

PRUSSIAN BLUE

Our Prussian Blue is guaranteed to be chemically pure. It has extraordinary staining strength, and is ground extremely fine in pure linseed oil of our own manufacture. Painters say it is unsurpassed for producing crackles green.

ULTRAMARINE BLUE

You will find that our ultramarine blue is close to white, fine and smooth. It yields rich dark colors and used alone makes a good solid color.

The Lewis line of colorants is a complete line—blue, red, yellow, green, black and brown. Sold in 1, 2, 4, 8 and 16 pound cans bearing the Lewis name and mark. They stand out—a double guarantee of excellence.

YELLOW

All our yellows are manufactured with the result of the practical process always improved in mind. Ground to the fine degree of fineness in purest form. Guaranteed for purity, strength and tone. The yellow line of French Blue includes includes both chrome and ochres.

CHROME YELLOWS

Chrome yellows are chemical yellows. Years of experience in their manufacture have taught us how to make them right. Our chrome yellows are well, long and perfect good body.

There are three grades: Chemically pure chrome, L. M. O. 100, Standard chrome, L. M. O. 200, Improved chrome L. M. O.

OGRES

Those who buy our French ochres can do so with absolute confidence that it is a genuine French ochre. The French law requires on each can guarantee the ochres to be exactly as represented.

We also make a number of American ochres which produce warmer and stronger tones, also include ochre, golden ochre, etc.

The French Blue line of ochres is complete - ochres, blues, greens, reds, blacks and browns. Sold in 1, 2, 10 and 25 pound cans.
