INTER-OFFICE COMMUNICATION

TO

DATE 4/23/49

FROM

SUBJECT Men with abnormal chest findings.

Current Findings

Name	Clock No.	Diagnosis
Harry Wolfe	1808	Silicotuberculosis. Low grade activity present. (old)
Ralph McKinney	1840	Silico-tuberculosis of moderately severe degree. (old)
Elm Sanders	1835	Probably low grade re-infection type pulmonary T.B. (old)

Cork Mill

Harry Lefever	1959	Stage 1 silicosis - with apical fibrosis. (old)
---------------	------	---

Salvador

Larl Bishop	979	Partially calcified hilar node - probably unstable.
Ira Stauffer	2128	First stage silicosis.
Milton Graybill	2095	Stage 1 silicosis.
Ralph Lennay	2160	Silicotuberculosis with possible emphysema.

Reinfection

George Gordon	10546	Perceptible silicosis.
Fred McSherry	3633	Re-infection type pulmonary T.B. Moderately advanced-probably stable at present. (old)
Robert K. Schaefer	18200	Infiltration-right first interspace. Cardiac enlargement.
Lester Fryberger	5568	Early peribronchial changes, both lung fields.

Inspection

Frank A. Iemallo	2000	Third degree silicosis. Extensive pleural thickening both upper lobes. (old)

Index

<u>Name</u>	<u>Clock No.</u>	<u>Diagnosis</u>
Henry Hoover	2483	Stage 1 pneumoconiosis.
Royal Travis	18793	Indeterminate.
Jack Sheaffer	1006	Location of nitral stenosis or first stage silicosis.
Charles Kala	1073	Profound pulmonary pathology. Etiology to be determined.
James Deane	2718	Indeterminate.
Samuel Bryant	18287	Indeterminate.
William Wenger	1081	Interstitial fibrosis-right lung with stable re-infection type pulmonary T.B.-right apex.
Gottlieb Theininger	1033	First stage silicosis.
Miller Strubel	1062	Early first stage silicosis.
Carl E. Stroeble	1009	Early stage 1 silicosis.
Arthur Reynolds	939	Changes indicative of early silicosis.
Jacob Peters	931	First stage silicosis.
Charles Paris	911	Stage 1 silicosis.
Ealter Martin	2	First stage silicosis.
Eddie Kelly	1055	Early silicosis.
Edna Leone	944	Stage 1 silicosis.
Almer Frey	5769	Just perceptible silicosis.
Charles Dietrich	1086	Emphysema. Deciduous to the right-dorsal-lower junction.
Vincent Kinney	1044	Just perceptible silicosis-with minimal re-infection type pulmonary T.B. right apex-stable. (red)

<u>Robert Condit</u>			
Gilbert Childs	1663	Very early first stage silicosis.	
John Fogle	994	First stage silicosis.	
Harvey Hines	18342	Silico-tuberculosis.	
John Isale	2449	Silico-tuberculosis- both apices.	
John Yeager	909	very early interstitial fibrosis.	
Abner Kruger	1023	Moderately severe emphysema.	
Charles McNamee	Sal.	Stage 2 silicosis. (alt)	
<u>Yard</u>			
Nicholas Lombardo	2549	Early interstitial fibrosis.	
David Ruzick	2553	Slight interstitial fibrosis.	
Thomas Ruzick	2521	First stage silicosis. Question of early re-infection type pulmonary T.B.	
Ward Schlemm	1142	Stage 2 silicosis.	
William Lisch	2551	First stage silicosis.	
Ira Miller	2543	First stage asbestosis.	
Pharos Weaver	4871	Re-infection type pulmonary T.B. Right apex. Suspect low grade activity.	
Abner Z. White	10155	Emphysema of severe grade-both lower lung fields. (alt)	
<u>File</u>			
Maurice Sullivan	613	Silico-tuberculosis-both upper lobes-stable. (alt)	
James Byerly	Sal.	Silicosis with re-infection type pulmonary T.B.-both apices. Emphysema-both bases.

NAME
Martin Rayer

Clock No.
6128

Diagnosis
Very early asbestosis.

Leo Nihalane

5662

Early first stage silicosis.

Charles Egan

427

First stage silicosis. *(old)*

Balcan E. Smith

541

Infiltration-both apices. Origin to be determined.

Isaac Knealey

6096

Moderately severe trunk shadow accentuation-both bases.

File 00114

Samuel Ekip

201

Stable re-infection type pulmonary T.B.

William Falk

117

Stage 2 silicosis. Cardiac pathology noted. *red*

Paul Hill

3887

Stage 2 silicosis.

Charles Buta

216

Very early first stage silicosis.

Bennett Fulmer

904

Negative for silicosis. Changes both apices noted.

Burdette E. Miller

10672

Indeterminate. Further studies advisable.

George Hull, Jr.

241

Interstitial fibrosis. Both apices not sufficient to warrant a diagnosis of silicosis.

Ernest Blank

6161

Silicosis-second degree with doubtful emphysematous changes.

George Butt

503

Stage one silicosis.

Robert Fisher

16703

First degree silicosis.

Martin Greenkey

73

First stage silicosis. *(old)*

Carl Korb

284

Early stage 1 silicosis.

Christ Lopp

65

First stage silicosis.

<u>Name</u>	<u>Clock No.</u>	<u>Diagnosis</u>
Enald Smith		
William R. Lunde	501	Third stage silicosis.
Water Litch	44	Late stage 1 silicosis.
Russell C. Hurr	298	Stage 1 silicosis.
William Zand	495	First stage silicosis. Emphysema- both bases.
Ray Scott	341	Indeterminate.
Joseph Sebastian	1032	Pneumoconiosis, first stage.
Charles Lee <i>Lee</i>	295	Slight interstitial fibrosis.
John Ely	30	Emphysema of moderate degree. Bronchiectasis-right base.
George Best	227	Indeterminate.
Joseph Lagari	331	Late stage 1 silicosis.
Edward Gramanalt	286	Moderately severe emphysema with interstitial fibrosis-both apices.
Sam E. Sanders	335	Early stage 2 silicosis.
Booby Kishi	348	Cardiac enlargement with pulmonary changes.
Paul Herr	208	Just perceptible interstitial fibrosis.
Edna Egan		
Irvin Flaga	1383	Pneumoconiosis-early stage 2.
Edward Henry	12494	Trunk shadow accentuation-probably early siderosis.
Ray Hagun	1754	Very early siderosis.
