

Airhat™ Brand Helmet

With built-in powered air purifier

Powered air protection for head, face and lungs. Goes where the worker goes without airlines and hoses.

Helmet is lightweight and balanced for comfort.

Provides total mobility for vehicle operation, bulk materials handling and bagging, foundry work, grain bins, and more. **NIOSH/MSHA Approved (TC-21C-225)** for dusts, mists and asbestos.

Helmet meets impact and penetration requirements for hard hat protection (ANSI Z89.1-1969).

Designed for reliability and easy, economical maintenance.

Face shield flips up for breaks or work in non-contaminated areas.

Plastic face shield meets impact and penetration requirements (ANSI Z87.1-1968). Wide angle visibility.

Electrical design passes U.L. and MSHA tests for intrinsic safety. High-capacity batteries provide long charge life. Will operate the Airhat Helmet continuously for a minimum of ten hours on one full charge.

Rugged construction withstands even extreme usage conditions.

Built-in purifier with comfortable air flow

Unique air flow pattern directs all the filtered air to face shield and passes gently over the face for maximum comfort even in hot environments.

Air is powered through the filters for easy breathing.

Lightweight battery pack on waist belt.

Airhat™ Brand Miner's System W-343

Same benefits as the standard Airhat™ Brand Helmet but includes miner's lamp bracket. Miner's cord clip fastens lamp cord to the back of the helmet.

Airhat™ Brand High Efficiency System

Same benefits as the standard Airhat™ Brand Helmet but also NIOSH/MSHA approved (TC-21C-248) for protection against dusts, fumes and mists, including PEL less than 0.5 mg/m³ and radon progenies and radon daughters attached to those dusts, fumes and mists.

Supplied Air Conversion

W-3001 Airhat Assembly converts the Airhat™ Brand Helmet for use with supplied air (see page 12).
