Material Safety Data - Cellex, Drispac®, Diacel® D and Soltex®

P-1-Sh-183-72D

Mr. W. B. Kirkland
Purchasing Agent
Baroid Division
P.O. Box 1675
Houston, Texas 77001

Dear Sir:

You have asked for material safety information on the products we sell you. This is to advise you that our products Cellex (Regular, High Viscosity and Technical Grade), Drispac, Diacel D and Soltex are not hazardous as defined by the Occupational Safety and Health Act of 1970. We will be pleased to give you any non-proprietary information on these products if you still feel you need it. This information in your U. S. Department of Labor Form LSB-OOS-4 would just clutter your files with non-essential information.

The U. S. Department of Labor's "Instructions and Explanation of Terms" for LSB-OOS-4 says, "The Material Safety Data Sheet (Form LSB-OOS-4), or one essentially similar, approved by the Bureau of Labor Standards, is required to be filled out only on materials which, when used without special precautions and controls, will constitute a health hazard to workers."

We are preparing forms for you on our products Flosal®, Diaseal M® and Desco®. These will be sent to you in the near future.

Very truly yours,

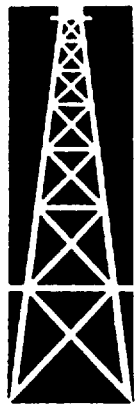

F. J. Shell

Re: Material Safety Data Sheets

Dear Sir:

Requests are continually being received from our customers for Material Safety Data Sheets on the various products that we sell. Among these are the following Drilling Specialties' products.

Flosal
Diaseal M
Diacel D
Desco
Cellex
Drispac
Soltex

Enclosed are Material Safety Data Sheets with the request that you submit in duplicate all the technical information available on each of these products.

Very truly yours,

WBK
