W. P. Pelz, M.D.
1504 East Clark Street
Charles City, Iowa

Dear Dr. Pelz:

We have received correspondence from the Standard Oil Company (Indiana) concerning your request for the equivalent of 300 cc's of tetraethyl lead. Due to the hazards connected with the handling of this product in concentrated form, requests of this type are sent to the Medical Director for the Ethyl Corporation.

You may wish to write directly to Dr. R. A. Kehoe, Medical Director, Kettering Laboratory, College of Medicine, Cincinnati, Ohio, giving the reasons for your need and the amount required for your work.

Yours very truly,

J. S. Synard,
Service and
Engineer
