

JR/

28th March, 1963.

The District Inspector of Mines,
Mines Department,
PORT HEDLAND

Dear Sir,

The attached will be of great interest to you. Will you please obtain three samples under the conditions outlined by Dr. McKelty.

The samples should be taken from different areas in Australian Blue Asbestos Colonial Mine and you should endeavour to include only the immediate rock casing. There should be at least 7lbs Asbestos in each sample.

When the samples are obtained will you please carefully pack them and airfreight them to this office.

Yours faithfully,

J. DOWLAND
ASSISTANT STATE MINING ENGINEER
