Subject: Call with ACEA

[REDACTED]

Online meeting with ACEA and Hyundai representatives on 20/01/2022

Participants: [REDACTED] and [REDACTED] from GROW.F1, [REDACTED] from ACEA and [REDACTED] from Hyundai.

GROW.F1 colleagues informed the stakeholders from the automotive industry about the upcoming opportunities to contribute to the consultation on the REACH revision, in particular the public consultation and workshops in March on the essential use concept and on the extended generic approach to risk management.

The stakeholders noted that they are planning a study that would focus on the impacts of the CSS on the automotive industry in particular, and highlighted that it is important to look at the impacts for downstream users in addition to impacts for the chemical industry.
