Any use, exploitation or commercialization outside the narrow limits set by copyright legislation, without the publisher's consent, is illegal and liable to prosecution. This applies in particular to photostat reproduction, copying, mimeographing or duplication of any kind, translating, preparation of microfilms, and electronic data processing and storage.

Important note: Medicine is an ever-changing science. Research and clinical experience are continually broadening our knowledge, in particular our knowledge of proper treatment and drug therapy. Insofar as this book mentions any dosage or application, readers may rest assured that the authors, editors, and publishers have made every effort to ensure that such references are strictly in accordance with the state of knowledge at the time of production of the book. Nevertheless, every user is requested to carefully examine the manufacturers' leaflets accompanying each drug to check on his own responsibility whether the dosage schedules recommended therein or the contraindications stated by the manufacturers differ from the statements made in the present book. Such examination is particularly important with drugs that are either rarely used or have been newly released on the market.

Some of the product names, patents, and registered designs referred to in this book are in fact registered trademarks or proprietary names even though specific reference to this fact is not always made in the text. Therefore, the appearance of a name without designation as proprietary is not to be construed as a representation by the publisher that it is in the public domain.

Contents

Preface to the Second Edition	vii
Preface to the First Edition	ix
Contributors	xi
1. Normal Anatomy and Histology <i>Charles Kubn III</i>	1
2. Lung Growth and Development <i>William M. Thurlbeck</i>	37
3. Quantitative Anatomy of the Lung <i>William M. Thurlbeck</i>	89
4. Pulmonary Defense Mechanisms <i>Drummond H. Bowden</i>	99
5. Lung Biopsy <i>Roberta R. Miller and Kenneth G. Evans</i>	107
6. Gross Examination of Lung Resection Specimens <i>Roberta R. Miller</i>	117
7. Examination of the Lung: Autopsy <i>William M. Thurlbeck</i>	129
8. Microbiological Considerations <i>Richard E. Sobonya</i>	137
9. Cytological Techniques <i>Roger W. Amy and S. Donald Greenberg</i>	145
10. Pulmonary Disorders in the Neonate, Infant, and Child <i>Claire Langston and Frederic B. Askin</i>	151
11. Viral Infections of the Respiratory Tract <i>Roberta R. Miller</i>	195
12. Mycoplasma, Chlamydia, and Coxiella Infections of the Respiratory Tract <i>Roberta R. Miller</i>	223
13. Tuberculosis and Other Mycobacterial Infections of the Lung <i>E.A. Allen</i>	229
14. Bacterial Infections <i>Charles Kubn III</i>	267

vi Contents

15.	Fungal Diseases, Including Allergic Bronchopulmonary Aspergillosis	303
	<i>Richard E. Sobonya</i>	
16.	Protozoal and Helminthic Pulmonary Infection	333
	<i>R.S. Fraser</i>	
17.	Pulmonary Disease in the Immunocompromised Host	349
	<i>Roberta R. Miller</i>	
18.	Diffuse Pulmonary Hemorrhage	365
	<i>Roberta R. Miller</i>	
19.	Pulmonary Edema	375
	<i>James C. Hogg</i>	
20.	Adult Respiratory Distress Syndrome	385
	<i>J.L. Wright</i>	
21.	Wegener's Granulomatosis	401
	<i>Richard A. DeRemee and Thomas V. Colby</i>	
22.	Churg-Strauss Syndrome	425
	<i>Jacob Churg</i>	
23.	Tumors of the Lung (Excluding Lymphoid Tumors)	437
	<i>Philip T. Cagle</i>	
24.	Lymphoid Proliferative Disorders of the Lung	553
	<i>Jeffrey L. Myers and Paul J. Kurtin</i>	
25.	Interstitial Lung Disease	589
	<i>Thomas V. Colby and Charles B. Carrington</i>	
26.	Chronic Airflow Obstruction	739
	<i>William M. Thurlbeck</i>	
27.	Lung Transplant Pathology	827
	<i>Philip T. Cagle</i>	
28.	Occupational Lung Disease	851
	<i>Andrew Churg and Francis H.Y. Green</i>	
29.	Vascular Disease	931
	<i>J. Michael Kay</i>	
30.	Diseases of the Pleura	1067
	<i>Andrew Churg</i>	
31.	Consequences of Aspiration and Bronchial Obstruction	1111
	<i>J.L. Wright</i>	
32.	Diagnostic Cytology	1129
	<i>S. Donald Greenberg and Roger W. Amy</i>
