RE: NEW POINT COMFORT "SAFETY RULES" BOOK

The new "Safety Rules" seem to have been well received by our plant people and our DuPont advisers were very complimentary of the total package.

There are some necessary additions and revisions to be made, however, and we need to get these accomplished without undue delay.

I wish to schedule a meeting of the Rules Committee on Wednesday, September 1st, at 1:00 p.m., in the Building 1 Conference Room to cover the following:

1. Ways to index the book for quick reference.
2. Method to distribute and be certain that revisions are incorporated into each book.
3. Method to identify an up to date revised book.
4. Proposed revisions and additions.

If you have any revisions or any items that have been brought to your attention that need correction, please call Bob Rose so that proposed changes can be accomplished before the meeting.
