DATE 4/25/49

FROM

SUBJECT Men with abnormal chest findings.

Current Findings

Name	Clock No.	Diagnosis
Harry Wolfe	1808	Silicotuberculosis. Low grade (old) activity present.
Ralph Malinow	1840	Silico-tuberculosis of moderately (old) severe degree.
Elm Sanders	1835	Probably low grade re-infection (old) type pulmonary T.B.
Cork Hill		
Betty Lafave	1559	Stage 1 silicosis - with apical fibrosis. (old)
Calender Earl Bamep	977	Partially calcified hilar nodes - probably unstable.
Ira Stauffer	2128	First stage silicosis.
Milton Graybill	2095	Stage 1 silicosis.
Ralph Lemahy	2160	Silicotuberculosis with possible emphysema.
Emery		
George Gordon	10546	Perceptible silicosis.
Fred McHenry	3633	Re-infection type pulmonary T.B. (old) Moderately advanced-probably stable at present.
Robert E. Schaefer	18400	Infiltration-right first interspace. Cardiac enlargement.
Lester Fryberger	5568	Early peribronchial changes, both lung fields.
Infection		
Frank A. Lemalle	2000	Third degree silicosis. Extensive pleural thickening both upper lobes. (old)

Primary Cases

Gilbert Childs

1663

Very early first stage silicosis.

John Fagle

974

First stage silicosis.

Evan Sisco

18342

Silico-tuberculosis.

John Shale

2249

Silico-tuberculosis both apices.

John Yeager

909

Very early interstitial fibrosis.

Alvan Freyer

1023

Moderately severe emphysema.

Charles McManley

Sal.

Stage 2 silicosis. (ed)

Latent

Nicholas Lombardi

2529

Early interstitial fibrosis.

David Buntin

2553

Slight interstitial fibrosis.

Thomas Buntin

2521

First stage silicosis. Question of early re-infection type pulmonary T.B.

Lloyd Ehlmann

1142

Stage 2 silicosis.

William Liehl

2551

First stage silicosis.

Ira Miller

2993

First stage asbestosis.

Thomas Weaver

4871

Re-infection type pulmonary T.B. Right apex. Suspect low grade activity.

Alvan Z. White

10253

Emphysema of severe grade-both lower lung fields. (ed)

File

Maurice Sullivan

613

Silico-tuberculosis-both upper lobes-stable. (Kd)

James Dyerly

Sal.

Silicosis with re-infection type pulmonary T.B.-both apices. Emphysema-both bases.

NAME	Clock No.	Remarks
Donald Smith		
Edgar		
William A. Lamb	301	Third stage silicosis.
Walter Litch	44	Late stage 1 silicosis.
Russell C. Marr	298	Stage 1 silicosis.
William Reed	493	First stage silicosis. Emphysema both bases.
Ray Scott	341	Indeterminate. (old) (red)
Joseph Sebastian	1032	Pneumoconiosis, first stage.
Charles Lee	373	Slight interstitial fibrosis.
John Ely	30	Emphysema of moderate degree. Bronchiectasis-right base.
George Beck	227	Indeterminate.
Joseph Lagari	331	Late stage 1 silicosis.
Edward Greenwald	386	Moderately severe emphysema with interstitial fibrosis-both apices.
Sam H. Souther	353	Early stage 2 silicosis.
Wesley Kiehl	348	Cardiac enlargement with pulmonary changes.
Paul Kerr	208	Just perceptible interstitial fibrosis.
Edith Chen		
Irvin Floyd	1383	Pneumoconiosis-early stage 4.
Edward Henry	12494	Trunk shadow accentuation-probably early siderosis.
Ray Hagen	1734	Very early siderosis.
