

He's the brains behind any better anti-corrosive paint.

But here's the brawn.

Sure, the formulator is really what makes better paints.

But you need strong help from better pigments, too. Like Oncor® M50®.

Oncor M50 is the Basic Lead Silico Chromate pigment that adds rust-resistance to every paint coat. Primer. Intermediate. Finish.

In just about any color. It builds in long-term economy. And, believe it or not, even your production men will approve. Because it's so easy to work with.

Want more information? Spec sheets? Booklets? Formulations? Or specific advice? Just write National Lead Company, Room 3159, 111 Broadway, New York, N.Y. 10006. (In Canada: Enelchem Products, Division of Titanium Pigments Ltd., 1401 McGill College Avenue, Montreal, Quebec.)
