Mr. E. L. Alpaugh - 1

Asbestosis Claim - Louisville Foundry

I think it would be worthwhile to review chest x-ray reports of total foundry group and specifically the workers in Department in which plaintiff worked. X-ray reports could be reviewed for 1) any statement that findings were consistent or suggestive of asbestosis, 2) review for descriptions which might suggest asbestosis eg. a) pleural calcifications, b) fibrosis in lower lung fields. I am in agreement with your calling Dr. Hulett.

Do you have access to autopsy findings or records on which diagnosis was based? *

Please keep me posted and let me know if I can be of help.

P. R. Eggum, M.D.

hda

* Dr. Hulett - can you answer for Dr. Eggum?
E.L.a.
