

FACTS

Industrial Hygiene Foundation. The Foundation is a non-profit association of industries for the advancement of healthful working conditions.

Vol. 6.

January, 1946

No. 1.

Practical Data on Employing the Veteran

The panel discussion on "Putting the Disabled Veteran Back to Work," a high point of the Foundation's last annual meeting, is being published separately from the meeting Proceedings and will be sent to member companies in a few days. This will speed up distribution of practical data which becomes more important daily with the increasing demobilization of service men. One source says veterans are being mustered out at the rate of 70,000 per month. The forthcoming report should be of specific assistance to companies in dealing with this grave problem. Those who have questions regarding the rehabilitation of service men may send them to the Foundation.

Results of Women in Industry Study Released

Copies of the Foundation's plant-to-plant investigation of "Health Problems of Women in Industry," were sent to members recently. The report presents factual data collected by Dr. C.O. Sappington in visits to 54 war plants throughout the East and Mid West. The study is receiving national publicity in the press and radio.

Annual Index of Digest; List of Publications

THE ANNUAL INDEX covering the monthly INDUSTRIAL HYGIENE DIGEST for 1945 is now being mimeographed and will be sent to members in the near future. Exactly 1163 separate items were reported during the year, exclusive of the November issue which is devoted to abstracts of most of the papers presented at the annual meeting. The list of the publications, and addresses, covered by the DIGEST, is being revised. This will also be sent to members in the near future so that they may order the text of articles abstracted in the DIGEST, when desired. Unless otherwise noted, the Foundation has no copies of original publications or reprints for distribution.

More New Members

Latest addition to the Foundation's membership is Allis-Chalmers Manufacturing Company. Other new members, not previously reported, are Ball Brothers Company and Firth Sterling Steel Company. Thirty-three new members joined in 1945.

Annual Meeting Comment: "The better the working conditions the better the point of view and the better the production!"

— Charles F. Kettering.

Company Publications Welcome

A number of member companies send the Foundation their "house organs" or employee publications. The staff is glad to receive these journals since they are helpful in keeping us informed of a member's industrial operations. "The Hawley Reporter," publication of the Hawley Products Company, carries the following slogan:

"More Days of Work Mean Fewer Days of Far."
