

1 He had been started at this time on some
2 Tylox which is a stronger pain medication than he had
3 been receiving, and he was also complaining of
4 swelling of his legs.

5 His examination at that time showed that he
6 still had poor breathing in his right lung. He had a
7 lot of swelling in his legs. He was given a fluid
8 pill and given some more Tylox.

9 Q And after seeing him on March 6th at your
10 office, when was the next time that your notes reflect
11 that you had occasion to see and treat Mr. Wood?

12 A Well, I admitted him to Baltimore County
13 General Hospital on March 19th, 1990.

14 Q Why was he admitted to the hospital on March
15 19th?

16 A Because of pain and shortness of breath.

17 Q And how long did he remain in the hospital?

18 A He was in the hospital for four days.

19 Q And during those four days were there any
20 diagnostic tests performed on him?

21 A He had a chest X-ray which showed that the
