NICA's Board Visits San Antonio

NICA's Board of Directors met in San Antonio, Texas, in January, to preview the facilities for our 15th Annual Convention to be held in that unique city October 3-8, 1970. These pictures show Board Members and guests working and relaxing.

They spent almost two days in discussions centered around the problems facing this Industry and its National Association—problems regarding health and safety, apprenticeship training, labor difficulties and the Joint Board. From these discussions came the theme for our Convention.

HEALTH—SAFETY—TRAINING
THE CHALLENGE OF THE 70's

All the educational programs will be constructed around this theme.

Since the January Meeting, much thought and work have gone into the development of the program. The result of these efforts will be shown in the June issue.

Those of you who attended the Scottsdale Convention (a three day meeting) will recall the outstanding educational and social programs presented for your enjoyment and to increase your knowledge of the Industry. Our 15th Annual Convention offers four days jam-packed—and we do mean "jam-packed" –with educational and social programs and promises to be the most exciting and informative meeting in our history.

No contractor, supplier, or manufacturer can afford to miss it—at four times the cost, it would still be your best investment. So, plan to attend with your associates. Their exposure to the educational programs will benefit you and your business. And, don't forget to bring the ladies—you'll be glad you did.

Yo'all come to San Antonio—Si!!!
