Make Window Washing *Safe!*

Ever-Fast Bronze Holdfast and Safety Belts are invaluable safety devices.

Ever-Fast Holdfast Anchors are genuine Government bronze, tensile strength 35,000 pounds per square inch. They are scientifically designed and when properly installed, will remain secure. No iron to rust and become unsafe.

Ever-Fast Holdfast Two-Rope Safety Belts are made of best grade oak tan tested leather. They are light in weight, easily attached or detached, pliable and comfortable to the wearer. These belts are equipped with genuine bronze, straight pull belt terminals, designed to equalize the strain on the anchors.

Ever-Fast Window Cleaning Devices are approved by the Underwriters' Laboratories. Used by International Harvester Company, Stevens Hotel, Bell Telephone Company, Western Electric Company, and scores of other large corporations whose aim and policy is safety.

Guard against imitations and insure positive safety by insisting that the name EVERFAST appears on each anchor and belt.

Announce Program For Newark Conference

THE Fourth Annual Eastern Safety Conference will be held in Newark, N. J., April 26, under auspices of the National Safety Council, Metropolitan Chapter, A.S.S.E., Northern New Jersey Chapter, A.S.S.E., Hudson County Safety Council, Newark Safety Council, and Paterson Safety Council.

General chairman will be S. F. Larchar, of T. A. Edison Industries, West Orange, N. J.; general secretary is Fred M. Rosseland, secretary-manager Newark Safety Council; and chairman of the program committee, W. R. Smith, assistant chief engineer, Public Service Production Company. Following is an outline of the tentative program:

Morning Session

1. The Cause of the Most Expensive Accidents in New Jersey Industries.
2. The Hazards of Low Voltage Electricity.
3. The No-Accident Month Campaign—Its Place in the Safety Movement.
4. Presentation of motion picture, "The Modern Miracle," recently completed by the American Gas Association illustrating the prone pressure method of resuscitation.

Afternoon Session

1. Savings Effected by Safety Engineers—Are They Reflected in the General Accounting Records?
2. Maintenance and Plant Housekeeping—Influence on Effectiveness of Safety Measures in Industry.
3. Principles of Successful Industrial Safety Work.
4. Round Table Discussion on Unusual Accidents That May Occur Anywhere, and the Lessons Learned from Them.
5. Motion Picture Presented by the Public Service Corporation of New Jersey.

A dinner meeting will be held in the evening for delegates and industrial executives. A special feature of this meeting will be an address by Frank Tichenor, New York City, on "Safety in Commercial Aviation.

A SAFETY SHOE

For Every Department of Industry

All Lehigh Shoes billed F. O. B. Destination
Samples billed Memo for Inspection

Many Industries and Insurance Companies have adopted and recommended Lehigh Safety Shoes because of the protective box toe that gives considerable resistance to falling objects.

Your men wear shoes anyway. Why not Lehigh Safety Shoes? Toe accidents are an absolute waste that benefit no one, and if eliminated will profit everyone.
