

**116% MORE POWER
PER POUND**

Up to 134% more starting torque per pound of motor... with as much as 116% more maximum torque per pound! As much as one third smaller... yet stronger mechanically AND electrically than any previous Westinghouse induction motor!

That's the achievement represented in the Westinghouse Life-Line—the biggest single advance in fundamental motor design in 58 years.

It wraps up in one solid steel-encased package, user preferences formerly obtainable only as

custom-built features, if at all.

It makes available to industry, in a standard line of motors, improvements perfected for special wartime requirements.

Life-Line Motors are now in production at the new Buffalo Westinghouse Motor Plant, in frame sizes representing the popular demand of induction motor ratings. Check your nearest Westinghouse office for availability, or write Westinghouse Electric Corporation, P. O. Box 2325, Buffalo 3, N. Y.

FEBRUARY 1948

APR 29 1948
VOLUME 92, NUMBER 2

A CROSS-INDEX OF SUBJECTS FOR THE MONTH

PLANT OPERATING METHODS, MAINTENANCE AND SAFETY
STEAM GENERATION, FUELS, FIRING AND COMBUSTION
TURBINES, ENGINES, AUXILIARIES; HYDRO POWER
DIESELS, GAS ENGINES AND ACCESSORIES
AIR CONDITIONING AND REFRIGERATION
ELECTRICAL EQUIPMENT, ELEVATORS
PIPING, VALVES AND SPECIALTIES
TRANSMISSION, LUBRICATION
STEAM SERVICES, HEATING
INSTRUMENTS, CONTROLS
PUMPS, COMPRESSORS

FEATURE ARTICLES

When you modernize do a complete job.....	64
Fit the air-conditioning system to the load: II.....	68
Telltale holes in unfired pressure vessels.....	70
Rebuild steam turbines modernize this 20-year-old plant.....	71
Bearing materials meet demands of diesel service conditions.....	74
Speaking of power.....	78
INDUSTRIAL-POWER CLUTCHES: a special section	
Applications to different services.....	79
Clutch types: their construction and operation.....	82
Air-operated clutches.....	86
Automatic designs extend clutch applications.....	87
Free wheeling, or overriding, for clutch applications.....	90
Magnet-applied designs.....	91
Electric drives can be used for speed control.....	93
Hydraulic drives with single and dual elements.....	94
Lab speeds gas-turbine development.....	95
Consider the operator when designing generating stations.....	100
How to avoid costly shutdowns through correct lubrication.....	103

DEPARTMENTS

Pump Q & A.....	106	New plant equipment.....	118
Power engineers' notebook.....	110	Data sheet.....	126
Power-plant problems.....	114	Technical briefs.....	128
News of the power field.....	132		
George Edwards: How power engineers can help in 1948.....	134		
Reader service page for new equipment and technical literature.....	178A
