SUBJECT: ANALYSIS OF INSULATION, AR #1979

PLAINTIFF'S EXHIBIT

USG-1487

Three insulation samples were received for the determination of the presence of asbestos. The samples were in self-sealing plastic bags labeled Calciner Duct; #2 Contrell Duct; and Rock Dryer Duct. The samples were analyzed by polarized light microscopy using dispersion staining. The results are as follows:

<u>SAMPLES</u>	<u>FIBERS PRESENT</u>
Calciner Duct	Asbestos, Mineral Wool
#2, Contrell Duct	Asbestos, Mineral Wool
Rock Dryer Duct	Asbestos, Mineral Wool
