Mr. Clifford Houle
U. S. Fish & Wildlife Service
Technical Laboratory
2725 Mountlake Boulevard East
Seattle, Washington

Dear Mr. Houle:

Mr. A. W. Hempelmann, Monsanto's Seattle office, informed us of your interest in Aroclor 1254 and Monsanto Technical Bulletin O/PL 306.

I am arranging for a sample of Aroclor 1254 which should arrive under separate cover.

I am sorry I cannot send you a copy of Bulletin O/PL 306 since it is currently out of print and undergoing extensive revision. As soon as the revised version is available, I will arrange for a copy for you.

I have enclosed some additional technical information which I hopecan be useful to you. In addition, I am enclosing copies of Monsanto's analytical procedures for the determination of PCB's in water, vapors, sediment and biological samples. We would appreciate any comments you may wish to offer regarding the methodology.

I am very interested in your proposed studies and would appreciate receiving any information you feel you are free to share.

Sincerely,

W. B. Papageorge, Manager
Environmental Control
