

On Public Works Office

LOS ANGELES, April 10 (A.P.)—Earl Lee Kelly, director of the state department of public works, announced work will start soon after July 1 on a \$100,000 building to house the department's offices here. He said a block of ground had been purchased as a site. It will be a one-story structure.

The local division has an office staff of 250 persons, a maintenance staff of 310 and handled \$10,000,000 worth of business last year, Kelly said.

Used exclusively by the company because it has an ultra-modern blower unit for forced air and air-conditioning installations and conversion of gravity systems to forced air. This provides ample ventilation in stores, cafes and for residential and commercial application."

period last year by 84 percent, although they were down 32 percent from the previous week.

As reported today by Engineering News-Record, total awards for the week were \$34,678,000, against \$49,008,000 in the preceding week and \$43,563,000 last year.

gineer, whose name was not disclosed, had invented what he termed the "world's best device" for holding cows' tails stationary during the milking process. She quoted the engineer as saying the device is "far superior" to the old and hazardous system of tying a brick to the bovine's tail.
