Hello EPA colleagues -

Wanted to share the attached and linked Alaska press releases related to our Alaska LNG project announcing recent significant commercial progress.

This also highlights the need for continued permitting progress through the FERC process and with the cooperating federal agencies.

Happy to further discuss or provide additional background if needed.

Thanks,

John Crowther

AGDC, BP Alaska announce agreement on key terms of gas sales agreement
Governor commends the parties for a major step forward on Alaska LNG Project

May 7, 2018 JUNEAU – The Alaska Gasline Development Corporation (“AGDC”) and BP Alaska on Monday announced an agreement on key terms of a gas sales agreement, a major step forward for the Alaska LNG Project.

The deal establishes terms for price and volume, and the parties anticipate finalization of a long-term gas sales agreement in 2018 for AGDC to purchase BP Alaska’s share of 30 trillion cubic feet of gas from the Point Thomson and Prudhoe Bay units.

“During my call last week with BP’s chief executive officer, Bob Dudley, I thanked BP for its commitment to the Alaska LNG Project. I also commend Keith Meyer and his team at AGDC that worked to make this historic deal happen,” **Governor Bill Walker** said. “This agreement means Alaskans are one step closer to finally monetizing the vast reserves of natural gas on the North Slope. The end result will be thousands of jobs, a significant reduction in energy costs to power homes and businesses, and cleaner air. Having BP – one of our longtime participants in this project – commit its share for the gas on the sale underscores the progress we continue to make to build a stronger Alaska.
