Subject: Thematic groups

Dear,

A mail to recap what we agreed yesterday.

First about tasks. Please find below a table with topics for the different thematic groups, as well as persons following it up from the Commission, we would hope to get your input on, before the NEM. Aga, Arno, Cornelius and myself will reach out to the individual groups. Regarding MOP provisional agenda items 8, 9, 13 and 14 (point b feedstocks) we see they are interrelated, even if according to our thematic groups they are spread in groups 2 and 4. For Cornelius and you to see how to handle.

We would like to get your input ideally one week ahead of the NEM, i.e. Wednesday 20/9 so we can include it the proposed annotated agenda that we would aim to send out on 21/9.

Thematic Group	Issue
1. HFC phase down (implementation and energy efficiency, leapfrogging, and acceleration ambition)	- Agenda item 11 [TVI] - Agenda item 16 [CR] - Agenda item 24 (MDIs draft CRP [AK])
2. Emissions of controlled substances and its exempted uses (e.g. feedstocks, by-production,	- Agenda item 9 [CR] - Agenda item 13 [CR]

process agent use, CFCs, methyl bromide QPS, banks of ODS and F-gases), monitoring including precursors	- Agenda item 14 [MB, AT] - Agenda item 14 [Feedstocks, CR]
3. Strengthening of Montreal Protocol institutions (e.g. monitoring of illegal trade, consumption and use, ban on import and export of equipment containing certain HFCs)	- Agenda item 17 [CR, AT]
4. Other GHGs (e.g. SF6, N2O, NF3, Sulfuryl fluoride), new non-controlled ODSs (incl. VSLs e.g. dichloromethane) and PFAS including TFA	- Agenda item 5 [AK] - Agenda item 8 [CR]

Regarding the practical organisation. We agreed we would continue to use TEAMS. The link for the teams group is below. The group has been renamed ‘GRP Thematic groups MP’ and a folder had been created for Nairobi:

https://teams.microsoft.com/l/team/19%3acFrR8eU6sZNAr8wC9W07E_W8Qj3cBYLNzWaRtzZSHz41%40thread.tacv2/conversations?groupId=bbe60fff-442a-41b8-b150-90503cae1ab5&tenantId=b24c8b06-522c-46fe-9080-70926f8dddb1

See below the table who is in which group. Please note that for Diane Menard, we can’t create a Teams access, so group 1 will from time to time need to send an email with any updates in in the group.

Good luck,

Thematic Group	Experts
1. HFC phase down (implementation and energy efficiency, leap frogging, and acceleration ambition)	

	○ ○ ○ ○ ○	
2. Emissions of controlled substances and its exempted uses (e.g. feedstocks, by-production, process agent use, CFCs, methylbromide QPS, banks of ODS and F-gases), monitoring including precursors	○ ○ ○ ○ ○ ○ ○	
3. Strengthening of Montreal Protocol institutions (e.g. monitoring of illegal trade, consumption and use, ban on import and export of equipment containing certain HFCs)	○ ○ ○ ○ ○ ○ ○ ○ ○ ○	
4. Other GHGs (e.g. SF ₆ , N ₂ O, NF ₃ , Sulfuryl fluoride), new non-controlled ODSs (incl. VSLs e.g. dichloromethane) and PFAS including TFA	○ ○ ○ ○ ○ ○ ○ ○ ○ ○
