TENTATIVE AGENDA
FOR THE OCTOBER 1968 MEETING
OF THE AIR HYGIENE & MANUFACTURING COMMITTEE

1. Report by L.C. Williams about the Bausch & Lomb Dust Counter:

   (a) Presentation of comparative charts of dust counts obtained by the Bausch & Lomb Dust Counter and the Impinger.

   (b) Evaluation of experiences with the Bausch & Lomb Dust Counter after extensive "in-plant" use.

2. Discussion of equipment designed for the reduction of dust in the blending, carding, spinning, twisting and weaving operations.

3. Plant Safety - Programs:

   (a) Extent of safety programs.

   (b) Responsibilities of the employees in charge of the programs.

   (c) Costs of safety programs versus savings due to decreasing lost time accidents.

Looking forward to seeing you all for an interesting meeting.

Sincerely yours,

H. H. Walter
