PAMROD MAKES COMPLETE LINE OF ASBESTOS-FREE, MOLDED FITTING COVERS.

NO ONE ELSE DOES!

PRODUCED
JM - 83

THAT'S WHY WE CAN MAKE YOU MONEY.

Everyone in the industrial insulation business knows the many reasons for the use of asbestos-free materials. And everyone in any business knows that having the handle on a widely demanded, labor-saving product increases profitability.

PAMROD puts you in that position with asbestos-free, molded high temperature "Ells" and "Tees", because we're the only company that manufactures a complete line of such products. We have it all.

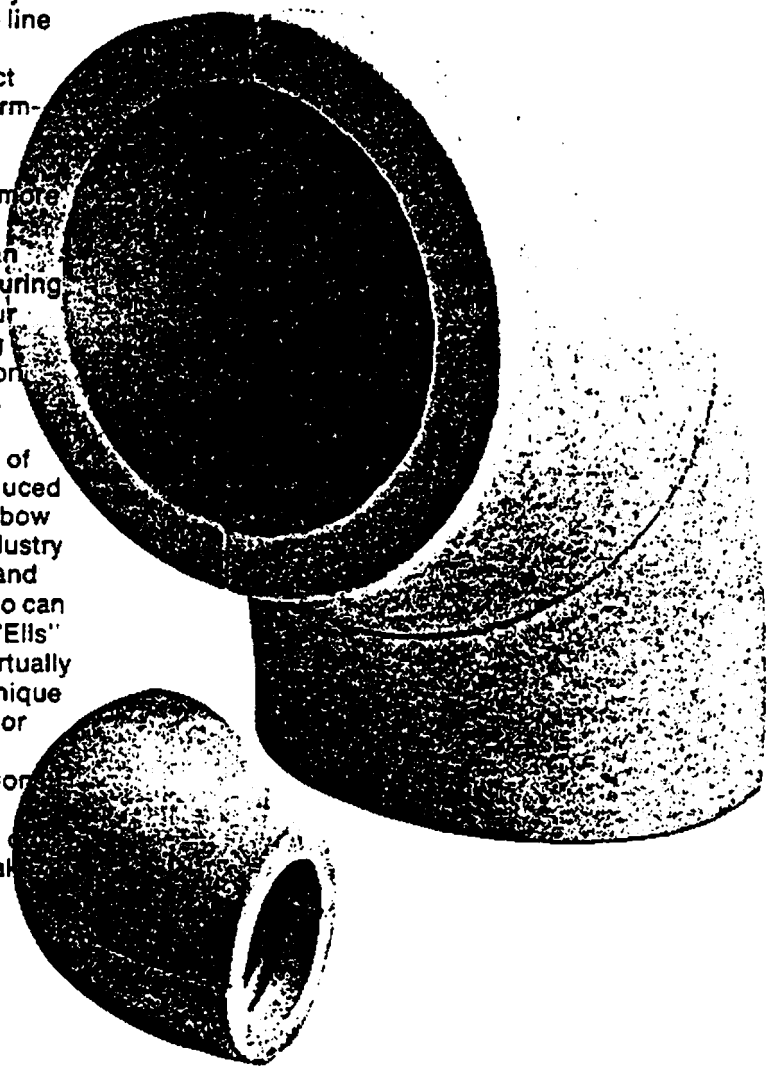

What else we have is the finest product available to the industry. Superior performance is engineered and built into every PAMROD insulation product. And, yet, PAMROD elbow and tee covers cost no more than competitive products.

Over the years, PAMROD has played an important role in establishing manufacturing standards for the insulation industry. Our innovative approach to problem-solving continues to result in improved insulation materials and more efficient application techniques.

Since 1960, when users and suppliers of high temperature insulation were introduced to PAMROD's exclusive molded silica elbow and tee covers*, the entire insulation industry has been realizing substantial material and application savings through their use. So can you... today. PAMROD's asbestos-free "Ells" and "Tees" are available in sizes to fit virtually any insulation need, and if you have a unique problem, we will help you solve it, too. For during more than two decades we have excelled in developing specialty insulation for our industry.

Give us a call. Let us prove to you that our insulation products and services will make you money.

*Manufactured under U.S. Patent No. 2,844,380
