PLAINTIFF'S EXHIBIT

CAP-371

May & June 1970

1. - -
Asbestos builds for steady growth; world markets...; accent on pollution control...aids asbestos growth. Chem Wk 106(24) 113, June 17, 1970.
2. - -
Canada the producer; Johns-Manville; without asbestos the industrial world would grind to a halt. Eng. & Min J. 170: 190, Sep. 1969.
3. - -
Quebec asbestos; largest reservoir of top-grade chrysotile asbestos in the world. Eng. & Min. J. 170: 191, Sep. 1969.
4. Arranaga, A. B.
Friction reduction characteristics of fibrous and colloidal substances -- including chrysotile asbestos. Nature (London) 225(5231), 447-9, 1970. (CA 72:80169).
5. Barnes, I. & O'Neil, J.R.
Relationship between fluids in some fresh Alpine-type ultramafics and possible modern serpentinization in western United States. Geol. Soc. Bull. 80: 1947-60, Oct. 1969.
6. Berkovich, T.M. & Dolinskaya, E.S.
Optimum fractional composition of serpentine asbestos in asbestos cement -- role of particle-size composition of chrysotile and ratio of coarse to fine fibers. Izv. Akad. Nauk SSSR
6. (cont.)
Neorg. Mater. 5(10), 1800-3, (1969) (Russ.) (CA 72:82573).
7. Bickerdike, R.L. & Hughes, G. to National Research Development Corp.
Resin-bonded mineral-fiber molds for iron castings -- asbestos, etc., mixed with epoxy, etc., shaped, hardened, & heated to form a mold. Brit. 1,178,487, 21 Jan. 1970. (CA 72:91275).
8. Hamme, R.B. & Johnson, R.M. to National Gypsum Co.
Integrally colored asbestos-cement products -- process for making an abrasion, wear, and moisture-resistant tile with variegated color and stonelike appearance. U.S. 3,491,174, Jan. 20, 1970. (CA 72:82614).
9. Hiemstra, S.A. & DeWaal, S.A.
Distribution of nickel in serpentine samples of borehole cores from the Msauli Mine, Barberton -- suggests possibility of magnesite and brucite as by-products of asbestos. Nat. Inst. Met. Repub. S. Afr., Res. Rep. no. 508 (1969). (Eng.) (CA 72: 92162).
10. Jeffery, W.G.
Asbestos -- 1969 annual review of Canadian production, prices, etc. Can. Min. J. 91(2), 146-8, Feb. 1970.

ASARCO ALV 0002650

11. Julian, Y. & McCrone, W.C.
Identification of asbestos fibers
by microscopical dispersion
staining -- differentiates
various types. Microscope 18(1),
1-10, Jan. 1970. (CA 72:84369,
& Single issues).

12. Koshi, K; Hayashi, H.; &
Sakabe, H.
Biological and mineralogical
studies on serpentine minerals
in the heat-treated state --
study of relation between toxic
action & structural changes.
Ind. Health (Kawasacki, Jap.)
7(1/2), 66-85, (1969) (Eng.)
(CA 72:98670).

13. McCluer, John D. to H.K.
Porter Co., Inc.
Aluminized fabric -- on asbestos
base, heat resistant to
molten metal splash, etc. & is
highly reflective. U.S.
3,496,057, 17 Feb. 1970.
(CA 72:91559).

14. Schnitzer, R.J. &
Pundsack, F.L.
Asbestos hemolysis --chrysotile
exerts marked hemolytic
activity as compared to other
asbestos fibers; cause & inhi-
bition studied. Envir. Res.
3(1), 1-13 (1970) (CA 72:93145).

15. Sememov, N.V. & Fedorov, B.F.
Possible use of filled acrylic
plastics in the assembly of
heavy duty machines -- recommends
pulverized asbestos as filler
for plastic joints & machine
assemblies operating at greater
than 75-80 degrees. Vop.
Soversh. Tekhnol. Protessov
Mashinostr 1968, 109 - 120,
(Russ.) (CA 72:80001).

16. U.S. House of Rep. Com-
mittee on Armed Services.
Authorizing disposal of chrysotile
asbestos from national
stockpile and supplemental
stockpile. Report to accompany
H.R. 16290. Mar. 18, 1970.
8p. H.R. 922 (Mo. Cat. 5/70
#6636).

17. U.S. Senate Committee on
Armed Services.
Disposal of chrysotile asbestos
from national and supplemental
stockpiles. Report to accom-
pany S. 3087. Mar. 13, 1970.
4p. S.R. 722. (Mo. Cat. 5/70
#6743).

18. Wilkinson, J.F.G.
Ultramafic and associated rocks
of northeastern New South Wales
-- serpentinites with petro-
graphic data and-chemical
analyses. Geol. Soc. Austral.
Jnl. 16(1), 299-307, (1969).
(CA 72:81481).
